and Music is an edited collection of essays that explore how musical artists respond to cruel or oppressive governments and ruling regimes Its primary strength and unique quality lies in its diversity presenting a postmodern collage of scholarship that reaches across the divides of classical popular and traditional musics just as it connects musical resistance of the past with the present and the near Western with the far non Western Contemporary topics include Choson s analysis of blood diamonds in the Sierra Leonean Civil War and collective memory in the Persian Gulf War songs Historical topics include the image of John Wilkes Booth in the popular imagination censorship in the Soviet Union Victor Ullman s song setting at Terez n artistic restrictions in Maoist China anti inquisition propaganda in the outbreak of the Dutch revolt Revolutionary Era

Anthems in the United States and much more These essays while remarkable in their scholarly erudition also provide intimate glimpses of the resiliency of the individual artist From Cherine Amr's Heavy Metal resistance to the Muslim Brotherhood to Hanns Eisler's battle with the United States House on Un American Activities Committee stories of human struggle and perseverance arise from each of these narratives

Commercial Culture Leo Bogart, 2017-09-29 American mass media are the world's most diverse rich and free Their dazzling resources variety and influence arouse envy in other countries Their failures are commonly excused on the grounds that they are creatures of the market that they give people what they want Commercial Culture focuses not on the glories of the media but on what is wrong with them and why and how they may be made better This powerful critique of American mass communication highlights four trends that sound an urgent call for reform the blurring of distinctions among traditional media and between individual and mass communication the increasing concentration of media control in a disturbingly small number of powerful organizations the shift from advertisers to consumers as the source of media revenues and the growing confusion of information and entertainment of the real and the imaginary The future direction of the media Leo Bogart contends should not be left to market forces alone He shows how the public's appetite for media differs from other demands the market is left to satisfy because of how profoundly the media shape the public's character and values Bogart concludes that a world of new communications technology requires a coherent national media policy respectful of the American tradition of free expression and subject to vigorous public scrutiny and debate Commercial Culture is a comprehensive analysis of the media as they evolve in a technological age It will appeal to general readers interested in mass communications as well as professionals and scholars studying American mass media

and broadcast vocabulary **Crude Awakenings** Steve A. Yetiv, 2010-12-15 The real story of global oil over the past twenty five years is not about the spillover effects of Palestinians fighting Israelis or terrorist attacks on U S forces in Saudi Arabia and Yemen or Iraq's stormy relationship with Kuwait It is not even about periodic small and large scale U S attacks on Iraq Rather the real story is about longer term developments that have changed the international relations of the Middle East politics at the global level and world oil markets These developments have increased oil stability from the Introduction Thirty years after OPEC shattered world markets for oil the Western world remains profoundly dependent on foreign particularly Middle Eastern sources of petroleum U S political rhetoric is suffused with claims about the vulnerability caused by this dependence Hence many political analysts assume that a search for stability of petroleum supplies is an important element of contemporary American foreign policy Steve A Yetiv argues that common assumptions about oil markets are wrong Although prices remain volatile Yetiv's account portrays a world market in petroleum products far more benign and predictable than the one to which we are accustomed In *Crude Awakenings* he identifies and analyzes real and potential threats to the global energy supply including wars revolutions coups dangerous alliances oil embargoes Islamic radicalism and transnational terrorism However he also shows how some of these threats have been mitigated and how global oil security has been reinforced **Musical Licensing in Restaurants and Retail and Other Establishments** United States.
