From Marx To The Market Socialism In Search Of An Economic System:

From Marx to the Market Wlodzimierz Brus, Kazimierz Laski, 1989-11-23 BL With a new preface by the authors This is an important work of original scholarship by two of the most distinguished East European economists now working in the West The authors both of whom were involved in the Planning Office of the Polish economy in the 1950s and 1960s present here the results of their efforts to develop theoretically a system of economic management which could in practice avoid the worst excesses of both market capitalism and central planning The conclusions derived from this analysis are shown to open up a new dimension to the socialism versus capitalism controversy which has dominated much of the world throughout the twentieth century and which is especially significant as the countries of East and Central Europe re structure their economies

Market Socialism Or the Restoration of Capitalism? Anders Aslund, 1992 When East European communism collapsed in the revolutions of 1989 the newly liberated countries discarded socialism altogether For the first time most of Eastern Europe experienced free elections and a multitude of parties mostly with liberal conservative or nationalist connotations made their entry into political life A bewildered world is now trying to imagine the future course of events Has capitalism won or is something different emerging Has market socialism vanished for good How can the transitionary period be managed and what effect will it have on the standard of living in Eastern Europe In this book ten distinguished experts explore this transition to a market economy in Eastern Europe In part I the authors consider what remains of market socialism Wlodzimierz Brus discusses the future roles of both planning and the market Mario Nuti argues that market socialism never existed whilst Gerhard Fink outlines how a normal market economy can be established

From Marx to Mises David Ramsay Steele, 2013-12-15 In 1920 Ludwig von Mises proclaimed that all attempts to establish socialism would come to grief for reasons of informational efficiency At first socialists and economists took Mises's argument seriously but by the end of the Second World War a consensus prevailed that Mises had been discredited More recently that consensus has been rapidly reversed it is now widely agreed that Mises was right Yet the momentous implications of the Mises argument for economics politics culture and philosophy remain largely unexplored *From Marx to Mises* is a clear penetrating exposition of the economic calculation debate and a scrutiny of some of the broader issues it raises

Planning and Market in Soviet and East European Thought, 1960s-1992 Jan Adam, 2016-07-27 This book discusses the evolution of ideas about the desirable combination of planning and market in the former Soviet Union Poland Czechoslovakia and Hungary since the 1960s when major economic reforms started up to 1991 when the countries have been engaged in a transformation of their economies into market economies It also discusses the common and contrasting features of the debates which evolved in the countries under review **Market Society** Don Slater, Fran Tonkiss, 2013-07-03 Market

Society provides an original and accessible review of changing conceptions of the market in modern social thought The book considers markets as social institutions rather than simply formal models arguing that modern ideas of the market are based on critical notions of social order social action and social relations Examining a range of perspectives on the market from across different social science disciplines Market Society surveys a complex field of ideas in a clear and comprehensive manner In this way it seeks to extend economic sociology beyond a critique of mainstream economics and to engage more broadly with social political and cultural theory The book explores historical approaches to the emergence of a modern market society as well as major approaches to the market within modern economic theory and sociology It addresses key arguments in economic sociology and anthropology the relation between markets and states and critical and cultural theories of market rationality It concludes with a discussion of markets and culture in a late modern context This wide ranging text will be of interest to undergraduate and postgraduate students in sociology economic theory and history politics social and political theory anthropology and cultural studies **Soviet SCI_BERIA** Ksenia Tatarchenko, 2024-10-03 At first glance the

Novosibirsk Scientific Center or Akademgorodok appears as an outlier in academic excellence This science city is renowned for a preeminent university dozens of research institutes and a thriving technopark At home it is an emblem of Russian innovation abroad it is often portrayed as a potential threat a breeding ground of cyber soldiers Though Siberia has been the main source of post 1991 Russian carbon revenues its soviet history and cold war legacy of internationalism demonstrates that territorial and scientific dimensions interlocked the moment the Siberian Branch of the Soviet Academy of Sciences was created in 1957 Drawing on a wide range of previously unexplored archives Soviet SCI_BERIA focuses on how the post Stalinist Siberia was redefined and represented through the ideal of rational development the late socialist innovation practices and the relationship between experts and the state It offers a fresh insight into the transition from Soviet to post Soviet Akademgorodok In doing so Tatarchenko not only fosters a conversation between history area studies and science

studies but also sheds new light on Soviet modernity and the limits of its transformative projects An Introduction to the History of Economic Thought in Central Europe Julius Horvath, 2020-12-11 This book addresses the comparative history of economic thought in Central European countries where there is a notable common historic heritage and political traits The author explores issues of Central European identity Habsburgian and Soviet influence and nationalistic traditions and reveals commonalities between Czech Hungarian Polish and Slovak economic thought such similarities proceed to explain aspects of contemporary economic and social policies in these countries This book aims to highlight connections among Central European economists and will be of interest to economists economic historians sociologists and historians *Populating No Man's Land* János Matyas Kovács, 2018-09-15 This edited volume opening the new series Revisiting Communism Collectivist Economic Thought in Historical Perspective focuses on the concepts of ownership the cornerstone of political economy in Soviet type societies The authors main objective is to contribute to the still unwritten chapter on collectivism in the history books of modern economic thought They trace the lengthy evolution of economic ideas of property reform under communism leading from the doctrine of blanket nationalization to projects of moderate privatization in eight countries of Eastern Europe and China The comparative analysis sheds light upon the tireless attempts of reform minded economists in communist countries to populate the no man s land of social property with quasi private economic actors such as bodies of workers self management and managers of state owned companies For a long time these were expected to crowd out the communist nomenklatura from its actual ownership position without challenging the primacy of collective property rights The fact that even the most radical reformers came to the conclusion that such surrogate owners would not be able to break the power of the ruling elite only on the eve of the 1989 revolutions demonstrates the immense strength of collectivist ideas The authors coin the term trap of collectivism to warn those demanding nationalization or other forms of non private ownership today it is rather easy even with the best intentions to walk into this trap but it may take long decades to break out from it **The Move to the Market?** Paul Cook, Frederick Nixon, 1995-09-12 The Move to the Market brings together recent contributions that critically review and examine the role that trade and industry policy reforms have played in the transitional economies It relates trade and industry policy to the wider set of reforms being implemented as part of the process of moving from a predominantly centrally planned to a more market oriented economy The book highlights the different and complex patterns of development that are emerging between the transitional economies of Europe Africa and Asia **Wu Jinglian** Barry J. Naughton, 2013-08-30 Writings by Wu Jinglian map not only China s path to economic reform but also the intellectual evolution of China s most influential economist For more than thirty years Wu Jinglian has been widely regarded as China s most celebrated and influential economist In the late 1970s Wu b 1930 was one of a small group of economic thinkers who broke with Marxist concepts and learned the principles of a market economy Since then he has been at the center of economic reform in China moving seamlessly as an insider outsider between academic and policy roles In recent years Wu

has emerged as a prominent public intellectual fighting not just for market reform but also for a democratic society backed by the rule of law This book presents many of Wu s most important writings a number of them appearing in English for the first time Each section offers an informative introductory essay by Barry Naughton the volume s editor and an expert on China s economy The book begins with Wu s most recent articles which make clear his belief that gradual marketization combined with institutional development will make Chinese society fairer and less corrupt Biographical writings follow accompanied by a richly insightful text by Naughton on Wu s life and career Writings from the 1980s and 1990s written originally for a small audience of policy makers demonstrate how Wu shaped China s early reform path essays and articles from the late 1990s and early 2000s reflect Wu s new role as an advocate for broader reforms Taken together these texts map not only China s path to economic reform but also Wu s own intellectual evolution

The Transformation Of Communist Systems Bernard Chavance, Charles Hauss, Mark Selden, 2019-06-26 In the confrontation between the two main economic systems that has marked the twentieth century capitalism has been declared the winner by default over its adversary socialism Today establishing a market economy has become the primary goal of the formerly socialist countries The history of economic reform helps explain this remarkable turning point Attempts to improve the old centralized system by expanding enterprise autonomy in Poland the Soviet Union and East Germany and more radical reforms that limited the role of central planning in Yugoslavia Czechoslovakia Hungary and China encountered social and political obstacles or had unexpected and undesired effects During the 1980s the idea of a socialist market economy which had been seen as a third way between capitalism and centralized socialism was abandoned as economists gradually came to support a free market rather than the dogma of planning Through a comparative and historical analysis of change in socialist and post socialist systems this timely and original book clarifies the policies and pitfalls in this extraordinary transition Bernard Chavance provides a succinct introduction and analysis of the politics and economics of Eastern Europe from the creation of the Stalinist system in the Soviet Union through what he argues have been three major waves of reform since the 1950s to the dismantling of most socialist governments in the 1990s Exploring the link between the one party regime and the growing rigidity of socialist economic systems the author analyzes the failure of both incremental and radical reforms to adapt to new economic challenges thus leading to the ultimate collapse of communist regimes in Europe

Sustainability and Security within Liberal Societies Stephen Gough, Andrew Stables, 2011-11-22 Much of the world will be living in broadly liberal societies for the foreseeable future Sustainability and security however defined must therefore be considered in the context of such societies yet there is very little significant literature that does so Indeed much ecologically oriented literature is overtly anti liberal as have been some recent responses to security concerns This book explores the implications for sustainability and security of a range of intellectual perspectives on liberalism such as those offered by John Rawls Robert Nozick Frederick Hayek Ronald Dworkin Michael Oakeshott Amartya Sen and Jürgen Habermas

The Dual Developmental State Ming Xia, 2017-12-01 This title was first published in 2000 The developmental state model which originated in Japan has ascended to the status of the leading paradigm for the East Asian political economy This text explores the proposition of many specialists that China has emulated the model and become part of the flying geese pattern of development

Lectures in Macroeconomics Kazimierz Laski, 2019 Lectures in Macroeconomics A Capitalist Economy Without Unemployment provides a systematic account of the principle of aggregate demand based on the work of Polish economist Micha Kalecki best known as one of the originators of the Keynesian Revolution in macroeconomics The lectures demonstrate the importance of aggregate demand in determining total output and employment in the capitalist economy They show how the investment decisions of firms affect economic growth arguing that due to the unstable nature of investment it is important that the government has a central role in stabilizing the economy This English translation of Kazimierz Laski s final work brings up to date fundamental concepts to give a picture of the twenty first capitalist economy and the obstacles that must be overcome in bringing it to full employment It introduces the role of money and finance in the contemporary capitalist economy as well as the central role of the labour market and wages The analysis is illustrated with statistics and discussion around the evolution of capitalist economies and the rise of economic inequality since the Second World War culminating in the 2008 crisis and the economic deflation affecting Europe since that crisis Lectures in Macroeconomics remarks critically upon the neo classical approach to economics that has brought about slow economic growth unemployment and inequality

Markets and Democracy Samuel Bowles, Herbert Gintis, Bo Gustafsson, 1993-07-22 This book asks whether a modern efficient economy can be rendered democratically accountable and if so what strategic changes might be required to regulate the market based interaction of economic agents The contributors bring contemporary microeconomic theory to bear in an attempt to find a progressive replacement to traditional state socialism Various approaches to the study of economic interaction are considered in an attempt to understand the relationship between power and efficiency in market economies

The Transition From Command To Market Economies In East-central Europe Sandor Richter, 2019-09-10 Now that the euphoria over political change has died down the formerly socialist countries of Eastern and Central Europe are facing an economic crisis The contributors to this well established annual publication consider the key factors affecting the economic transition process analyzing possible strategies for successful reform including the use of shock theory to accelerate the process As well as examining various country specific problems the authors explore the status of the Central European countries seeking integration with the European Economic Community and ask whether all the former socialist countries might do well to adopt some of the economic development strategies used so successfully by the nations of Southeast Asia
