Fair Trade United States. Congress. House. Committee on the Judiciary, 1975 **Do Federal Social Programs Work?** David B. Muhlhausen, 2013-04-09 Addressing an issue of burning interest to every taxpayer a Heritage Foundation scholar brings objective analysis to bear as he responds to the important and provocative question posed by his book's title Of course the answer to that question will also help determine whether the American public should fear budget cuts to federal social programs Readers says author David B Muhlhausen can rest easy As his book decisively demonstrates scientifically rigorous national studies almost unanimously find that the federal government fails to solve social problems To prove his point Muhlhausen reports on large scale evaluations of social programs for children families and workers some advocated by Democrats some by Republicans But it isn't just the results that matter It's the lesson to readers on how Americans can and should accurately assess government programs that cost hundreds of billions of dollars each year At the book's core is an insistence that we move beyond anecdotal reasoning and often partisan opinion to measure the effectiveness of social programs using objective analysis and scientific methods At the very least the results of such analysis will like this book provide a sound basis for much needed public debate **The Life, Death, and Afterlife of the Record Store** Gina Arnold, John Dougan, Christine Feldman-Barrett, Matthew Worley, 2023-06-15 Once conduits to new music frequently bypassing the corporate music industry in ways now done more easily via the Internet record stores championed the most local of economic enterprises allowing social mobility to well up from them in unexpected ways Record stores speak volumes about our relationship to shopping capitalism and art This book takes a comprehensive look at what individual record stores meant to individual people but also what they meant to communities to musical genres and to society in general What was their role in shaping social practices aesthetic tastes and even loosely put ideologies From women owned and independent record stores to Reggae record shops in London to Rough Trade in Paris this book takes on a global and interdisciplinary

approach to evaluating record stores It collects stories and memories and facts about a variety of local stores that not only re centers the record store as a marketplace of ideas but also explore and celebrate a neglected personal history of many lives

Probabilistic Optimisation Of Composite Structures: Machine Learning For Design Optimisation Kwangkyu Alex Yoo,Omar Bacarreza Nogales,M H Ferri Aliabadi,2025-03-17 This book introduces an innovative approach to multi fidelity probabilistic optimisation for aircraft composite structures addressing the challenge of balancing reliability with computational cost Probabilistic optimisation pursues statistically reliable and robust solutions by accounting for uncertainties in data such as material properties and geometry tolerances Traditional approaches using high fidelity models though accurate are computationally expensive and time consuming especially when using complex methods such as Monte Carlo simulations and gradient calculations For the first time the proposed multi fidelity method combines high and low fidelity models enabling high fidelity models to focus on specific areas of the design space while low fidelity models explore the entire space Machine learning technologies such as artificial neural networks and nonlinear autoregressive Gaussian processes fill information gaps between different fidelity models enhancing model accuracy The multi fidelity probabilistic optimisation framework is demonstrated through the reliability based and robust design problems of aircraft composite structures under a thermo mechanical environment showing acceptable accuracy and reductions in computational time
