Gard, 2015-09-09 The names of places lie upon the land and tell us where we are or where we have been or where we want to go And so much more From the introduction Fifty years ago educator and writer Robert E Gard traveled across Wisconsin learning the trivial controversial and landmark stories behind how cities counties and local places got their names This volume records the fruits of Gard s labors in an alphabetical listing of places from every corner of Wisconsin and the stories behind their often unusual names Gard s work provides an important snapshot of how Wisconsin residents of a bygone era came to understand the names of their towns and home places many of which can no longer be found on any map Celebrated rural historian Jerry Apps introduces this reprint of Gard s work saying that in some ways *The Romance of Wisconsin Place Names* is a reference book a place where you can go to learn a little more about your home town But in many ways it is much more than that for it includes the stories of places throughout the state submitted by the people who knew them It is a book where story people and place all come together **The Channel Pilot** Great Britain. Speed, Hai Cheng, 2021-06-21 Chapter 1 shows that the windward slope of Barbados and its terraced morphology evolved principally by wave erosion during uplift and eustatic oscillation rather than by biohermal growth Chapter 2 describes the interplay of erosion and limestone deposition during eustatic oscillation over a span of 700 000 years It represents the first comprehensive field and chronologic study to integrate marine erosion and deposition with tectonic uplift rates to determine emergence values and rates of the stratigraphic and evolutionary model Chapter 3 describes the distributions lithology depositional environments and ages of the limestone stratigraphic subunits for seven study areas in southeastern Barbados
