## **High Speed Networks Internets Pie:**

Protocols for High Speed Networks Georg Carle, Martina Zitterbart, 2003-08-01 This workshop on Protocols for High Speed Networks is the seventh in a successful series of international workshops well known for their small and focused target audience that provide a sound basis for intensive discussions of high quality and timely research work. The location of the workshop has alternated between Europe and the United States at venues not only worth visiting for the workshop but also for the distinct impressions they leave on the participants. The first workshop was held in 1989 in Zurich. Subsequently, the workshop was moved to Palo Alto 1990, Stockholm 1993, Vancouver 1994, Sophia Antipolis Nice 1996 and Salem 1999. In 2002, the workshop was hosted in Berlin, the capital of Germany. PfHSN is a workshop providing an international forum that focuses on issues related to high speed networking such as protocols, implementation techniques, router design, network processors and the like. Although the topics have shifted during the last couple of years, for example from parallel protocol implementations to network processors, it could be observed that high speed remains a very important issue with respect to future networking. Traditionally, PfHSN is a relatively focused and small workshop with an audience of about 60 participants.

High-Speed Networks and Multimedia Communications Mário Marques Freire, Pascal Lorenz, Mike Myung-Ok Lee, 2004-03-06 The refereed proceedings of the 6th IEEE International Conference on High Speed Networking and Multimedia Communication HSNMC 2003 held in Estoril, Portugal, in July 2003. The 57 revised full papers presented were carefully reviewed and selected from 105 submissions. The papers are organized in topical sections on integrated differentiated services, multicasting, peer-to-peer networking, quality of service, QoS, network and information management, WDM networks, mobile and wireless networks, video, CDMA, real-time issues and protocols for IP networks, multimedia streaming, TCP performance, voice over IP and traffic models.
