High-Speed Networking with LAN Switches Gilbert Held,1997-10-15 A timely guide to the hottest topic in networking LAN switching is one of the most talked about topics in networking today With networking demands showing no signs of slowing down LAN switching is being hailed as the answer to the bandwidth and congestion problems plaguing Net users and the switching market is expected to triple within a year Major networking players like Cisco Cabletron and Bay Networks are investing heavily in the LAN switching market In this book author Gil Held provides detailed comprehensive coverage of what LAN switching is and how switches work High Speed LAN Technology Handbook Dhiman D. Chowdhury,2000-05-09

This book teaches the architectures design principles and troubleshooting techniques of a LAN imparted via the presentation of a broad scope of data and computer communication standards real world inter networking techniques architectures hardware software protocols technologies and services as they relate to the design implementation and troubleshooting of such a network

High-Speed Networking James P. G. Sterbenz,Joseph D. Touch,2002-03-14 Leading authorities deliver the commandments for designing high speed networks There are no end of books touting the virtues of one or another high speed networking technology but until now there were none offering networking professionals a framework for choosing and integrating the best ones for their organization s networking needs Written by two world renowned experts in the field of high speed network design this book outlines a total strategy for designing high bandwidth low latency systems Using real world implementation examples to illustrate their points the authors cover all aspects of network design including network components network architectures topologies protocols application interactions and more *High Performance Networking*

Harmen R. van As,2013-03-09 High Performance Networking is a state of the art book that deals with issues relating to the fast paced evolution of public corporate and residential networks It focuses on the practical and experimental aspects of high performance networks and introduces novel approaches and concepts aimed at improving the performance usability interoperability and scalability of such systems Among others the topics covered include Java applets and applications distributed virtual environments new internet streaming protocols web telecollaboration tools Internet Intranet real time services like multimedia quality of service mobility High Performance Networking comprises the proceedings of the Eighth International Conference on High Performance Networking sponsored by the International Federation for Information Processing IFIP and was held at Vienna University of Technology Vienna Austria in September 1998 High Performance Networking is suitable as a secondary text for a graduate level course on high performance networking and as a reference for researchers and practitioners in industry

Local Area High Speed Networks Sidnie Feit,2000 There is a great deal of change happening in the technology being used for local networks As Web intranets have driven bandwidth needs through the ceiling inexpensive Ethernet NICs and switches have come into the market As a result many network professionals are interested in evaluating these new technologies for implementation consideration If you are looking for advice from experts

who can help you realistically compare and decide how to use the options before you. Often books on this subject are too varied in subject matter attempting to cover too many subjects in the book. This book addresses the topic of Ethernet Networking from a planning perspective to a bit analysis of the Ethernet packets. It explains in detail information in the new network administrator would find it necessary to know. High-Speed Cisco Networks John R. Vacca, 2001-12-21. High Speed Cisco Networks Planning Design and Implementation covers LAN WAN technology and its benefits. The book lays out Cisco's complete line of products and describes their features and best applications. It provides critical details on routers and servers switches and hubs security products network management tools ATM products other services and programs and Internetwork Operating Systems IOS. Cisco's routers hubs and switches are the core of the Internet and today's high speed networks. Armed with this independent evaluation the reader can design high speed networks that meet current needs and scale to future requirements with confidence. Protocols for High Speed Networks Georg Carle, Martina Zitterbart, 2003-08-01. This workshop on Protocols for High Speed Networks is the seventh in a successful series of international workshops well known for their small and focused target audience that provide a sound basis for intensive discussions of high quality and timely research work. The location of the workshop has alternated between Europe and the United States at venues not only worth visiting for the workshop but also for the distinct impressions they leave on the participants. The first workshop was held in 1989 in Zurich. Subsequently the workshop was moved to Palo Alto 1990 Stockholm 1993 Vancouver 1994 Sophia Antipolis Nice 1996 and Salem 1999. In 2002 the workshop was hosted in Berlin the capital of Germany. PfHSN is a workshop providing an international forum that focuses on issues related to high speed networking such as protocols implementation techniques router design network processors and the like. Although the topics have shifted during the last couple of years for example from parallel protocol implementations to network processors it could be observed that high speed remains a very important issue with respect to future networking. Traditionally PfHSN is a relatively focused and small workshop with an audience of about 60 participants. Protocols for High Speed Networks IV G. Neufeld, M. Ito, 2013-11-11. Welcome to the fourth IFIP workshop on protocols for high speed networks in Vancouver. This workshop follows three very successful workshops held in Zurich 1989 Palo Alto 1990 and Stockholm 1993 respectively. We received a large number of papers in response to our call for contributions. This year forty papers were received of which sixteen were presented as full papers and four were presented as poster papers. Although we received many excellent papers the program committee decided to keep the number of full presentations low in order to accommodate more discussion in keeping with the format of a workshop. Many people have contributed to the success of this workshop including the members of the program committee who with the additional reviewers helped make the selection of the papers. We are thankful to all the authors of the papers that were submitted. We also thank several organizations which have contributed financially to this workshop specially NSERC ASI CICSU UBC MPR Teltech and Newbridge Networks. **High-Performance Backbone**
