Davies,2018-03-09 Of the many futuristic military aircraft concepts created in the 1950s the North American XB 70 still stands out as the most awe inspiring With its huge white partially folding delta wing its fuselage resembling a striking cobra and its extraordinary performance it was one of the foremost technological achievements of the 20th Century A strategic bomber built to outrun any Soviet fighter jet it could reach Mach 3 with a full nuclear payload as fast as the legendary SR 71 Blackbird but more than three times the size However its role as a nuclear bomber was limited after the introduction of Intercontinental Ballistic Missiles and defence cuts eventually led to the project being scrapped in the mid 1960s The Valkyrie had a brief costly decade of life but it proved the continuing value of developing manned bombers However almost half a century after the XB 70 its predecessor the B 52 continues in service Using full colour artwork and rigorous analysis this is the complete story of the ultimate US Cold War military X plane

All-Weather Fighters Gordon B. Greer,2006-09-11 Mr Greer outlines the not well known aircraft and activities of the United States Air Force s all weather fighters during the first part of the Cold War He covers the organization development and decline of the all weather force in response to the Soviet Union s long range strategic bomber force equipped with atomic weapons The author describes not only the individual aircraft from the early night fighters of World War II through the F 106A of the seventies and beyond but also the control organization that directed them until the whole operation was made superfluous by the ballistic missile standoff between the United States and the Soviet Union in the latter half of the Cold War
