Higher Learning In America:

The Higher Learning in America Thorstein Veblen, 2007-08-01 At the time of its initial publication in 1904 *The Higher Learning in America* was known in educated circles as the most reflective study ever made of the university system in America Veblen's evaluation of the misleading notions and erroneous beliefs were inherent in the higher learning was received as fair by most academics As a result many believed he paved the way to an improved age in college education Just as applicable today as they were decades ago his sophisticated style remains deprecatingly amusing his biting critique just as disquieting as it was at the turn of the 19th century *The Higher Learning in America* remains a penetrating book by one of America's greatest social critics American economist and sociologist THORSTEIN BUNDE VEBLEN 1857-1929 was educated at Carleton College Johns Hopkins University and Yale University He coined the phrase conspicuous consumption Among his most famous works are *The Theory of the Leisure Class* 1899 *The Theory of Business Enterprise* 1904 and *Imperial Germany and the Industrial Revolution* 1915 [*The Higher Learning in America* Robert Maynard Hutchins, *The Higher Learning in America: The Annotated Edition* Thorstein Veblen, 2015-06-01](#) The first scholarly edition of Thorstein Veblen's classic indictment of the corporate model of American university governance Since its publication in 1918 Thorstein Veblen's *The Higher Learning in America* has remained a text that every serious student of the American university must confront Intellectual historian Richard Teichgraber brings us the first scholarly edition of Veblen's classic thoroughly edited annotated and indexed An extensive introduction discusses the book's composition and publishing history Veblen's debts to earlier critics of the American university and the place of *The Higher Learning in America* in current debates about the American university Veblen's insights into the American university system at the outset of the twentieth century are as provocative today as they were when first published Insisting that institutions of higher learning should be dedicated solely to the disinterested pursuit of knowledge he urged American universities to abandon commitments to extraneous pursuits such as athletics community service and vocational education He also believed that the corporate model of governance with university boards of trustees dominated by well-to-do businessmen and university presidents who functioned essentially as businessmen in academic dress mandated unsavory techniques of salesmanship and self-promotion that threatened to reduce institutions of higher learning to the status of competitive business enterprises With a detailed chronology suggested readings and comprehensive notes identifying events individuals and institutions to which Veblen alludes this volume is sure to become the standard teaching text for Veblen's classic work and an invaluable resource for students of both the history and the current workings of the American university *The Higher Learning in America* Thorstein Veblen, 2013-11 This is a reproduction of a book published before 1923 This book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process We believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our

The Higher Learning in America Thorstein Veblen, 2024-08-23 One test of a classic work of social criticism is to see if the critique's central logic and arguments remain generally applicable beyond the critic's own time One work that has lost little of its polemical power or social relevance is Thorstein Veblen's *The Higher Learning in America* First published in 1918 this volume sharply attacked the ascendancy of business values and concerns in America's universities In Veblen's critical analysis the institutions of higher learning have taken on the aspects of corporations and trusts relegating the pursuit of knowledge to secondary status Today when the mission of higher education is uncertain and universities compete for endowments and students this volume is as timely as ever Veblen was not only America's most famous economist and social critic but a distinguished academic as well having taught at major universities and the New School for Social Research His critique is built around an essential distinction between higher learning and career or vocational training Emphasizing the primacy of learning over training he repudiates the practice of appointing unqualified businessmen as governing trustees and condemns college administration conceived along corporate guidelines The entrepreneurial spirit in this instance understands learning as marketable knowledge and measures academic prestige in terms of needlessly elaborate building projects and material equipment Veblen's alternative vision severs the pursuit of knowledge and free inquiry from the institutional restrictions of economic interest Undergraduate colleges and professional schools are to be detached from the university while self governance among professors and students replaces boards of trustees and presidents Veblen's view of learning was tied to a larger conception of civilization in which an idly curious elite built and elaborated upon bodies of knowledge that sustained the practical institutions of society Ivar Berg's brilliant and stimulating introduction to this new edition offers a critical reading of Veblen's work in its own context and applies its arguments to controversies currently surrounding the American university *The Higher Learning in America* continues to be of interest to educators intellectual historians economists and sociologists

The Higher Learning in America, 1994 *The Higher Learning in America* Robert Maynard Hutchins, 2017-07-05 Perhaps the pivotal book in the reform of higher education in the United States Robert M Hutchins' classic is once again available with a brilliant personal and professional appreciation by Harry S Ashmore When it was published in 1936 *The Higher Learning in America* brought into focus the root causes of the controversies that still beset the nation's educational system Taking office in 1929 as president of the University of Chicago Hutchins began his

tenure by declaring the learning available in even the most prestigious universities grossly deficient He cited himself as case in point At Yale he had graduated at the top of his college class and set a record in the law school that led to appointment as professor and at 26 promotion to dean But he had acquired only some knowledge of the Bible of Shakespeare and Faust of one dialogue of Plato and of the opinions of many semi literate and a few literate judges and that was about all The curricular reforms and administrative reorganization he undertook at Chicago are set forth in this volume along with the philosophical arguments he worked out to explicate and defend his views His goal was to reestablish the liberal arts and humanities as the basis for undergraduate education consigning specialization and research to graduate and professional schools Hutchins envisioned the university as a community of scholars who in addition to teaching and research provided independent thought and criticism of a society being rapidly transformed by science and technology Challenging the educational establishment at every pertinent level he became the most celebrated and most controversial intellectual of his era After twenty two years at Chicago Hutchins became associate director of the newly enriched Ford Foundation where he was primarily responsible for the bold reforms sponsored by its Fund for the Advancement of Education and Fund for Adult Education In 1960 he est
