is a timeless tale all readers are sure to enjoy *The Complete Poems of Carl Sandburg* Carl Sandburg,1970 Presents the Pulitzer Prize winning collection of the complete poems of twentieth century American poet Carl Sandburg The Hangman's Knot David Wiltse,2016-09-26 It s the hottest summer ever in Falls City Nebraska Acting deputy Billy Tree is struggling to readjust to his old hometown as well as recover from the shattering tragedy that ended his Secret Service career But amid the shimmering heat deserted barns and burning plains a horrifying decades old injustice is about to rear its ugly head when a stranger with a vendetta arrives hell bent on making Falls City pay for its sins *The Hangman's Scrapbook* Neil R Storey,2025-01-16 During his years as executioner between 1901 and 1924 John Ellis hanged over 200 men and women Among them were some of the most infamous killers of the 20th century including Dr Crippen John Dickman The Railway Murderer George Smith The Brides in the Bath murderer Henry Jacoby poisoners Frederick Seddon and Major Herbert Rowse Armstrong Ellis also hanged Sir Roger Casement for treachery and carried out the execution of Edith Thompson one of the most controversial hangings in the history of capital punishment British executioners kept their own ledgers recording brief details of those they hanged John Ellis maintained just such a ledger too but he is believed to be the only British executioner to have kept an additional scrapbook of his personal accounts of those he executed and their crimes and as such it is a unique volume in the annals of British crime and punishment Rediscovered after being lost for decades John Ellis scrapbook its cuttings manuscript texts and annotations have now been diligently transcribed and we can now read the book Ellis envisaged in his own words and in doing so we gain a remarkable insight into the life and executions one of Britain s most notable but least known hangmen Russian verbal prefixation Yulia Zinova,2021 This book addresses the complexity of Russian verbal prefixation system that has been extensively studied but yet not explained Traditionally different meanings have been investigated and listed in the dictionaries and grammars and more recently linguists attempted to unify various prefix usages under more general descriptions The existent semantic approaches however do not aim to use semantic representations in order to account for the problems of prefix stacking and aspect determination This task has been so far undertaken by syntactic approaches to prefixation that divide verbal prefixes in classes and limit complex verb formation by restricting structural positions available for the members of each class I show that these approaches have two major drawbacks the implicit prediction of the non existence of complex biaspectual verbs and the absence of uniformly accepted formal criteria for the underlying prefix classification In this book the reader can find an implementable formal semantic approach to prefixation that covers five prefixes za na po pere and do It is shown how to predict the existence semantics and aspect of a given complex verb with the help of the combination of an LTAG and frame semantics The task of identifying the possible affix combinations is distributed between three modules syntax which is kept simple only basic structural assumptions frame semantics which ensures that the constraints are respected and pragmatics which rules out some prefixed verbs and restricts the range of available interpretations For the purpose of the evaluation of the theory an implementation

of the proposed analysis for a grammar fragment using a metagrammar description is provided It is shown that the proposed analysis delivers more accurate and complete predictions with respect to the existence of complex verbs than the most precise syntactic account
