Cultural Production in and Beyond the Recording Studio Allan Watson,2014-09-19 Recording studios are the most insulated intimate and privileged sites of music production and creativity Yet in a world of intensified globalisation they are also sites which are highly connected into wider networks of music production that are increasingly spanning the globe This book is the first comprehensive account of the new spatialities of cultural production in the recording studio sector of the musical economy spatialities that illuminate the complexities of global cultural production This unique text adopts a social geographical perspective to capture the multiple spatial scales of music production from opening the black box of the insulated space of the recording studio through the wider contexts in which music production is situated to the far flung global production

networks of which recording studios are part Drawing on original research recent writing on cultural production across a variety of academic disciplines secondary sources such as popular music biographies and including a wide range of case studies this lively and accessible text covers a range of issues including the role of technology in musical creativity creative collaboration and emotional labour networking and reputation and contemporary economic challenges to studios As a contribution to contemporary debates on creativity cultural production and creative labour Cultural Production in and Beyond the Recording Studio will appeal to academic students and researchers working across the social sciences including human geography cultural studies media and communication studies sociology as well as those studying music production courses

Microphone Techniques in Stereo and Surround Recording Adam Rosiński, 2022-11-22 Sound engineering is one of the fastest growing branches of music production The need for a broad based discussion on the issues constituting the art of sound engineering persists and loses none of its relevance revealing that sound engineering should not be investigated only in the mathematical and physical context musical acoustics or the engineering aspect signal processing and modification Publications targeted primarily at musicians are few and far between which is why the mutual understanding for different priorities which effectively concern the same issues faced by the engineer the acoustician and the musician seems to be a complex problem and the main concept explored in this publication This book is intended for musicians or sound directors but also acousticians and sound engineers wishing to learn how the musicians think The monograph is also addressed to musicians who intend to record their material in the studio in the near future but do not possess knowledge on studio construction studio workflow or the art of recording It seems important to familiarize the musicians with the reality that awaits them on the other side of the glass thus fostering their responsibility for the work jointly produced by them entering the studio and the sound director
