Paradox Steven Goldsmith, M.D.,2013-06-18 Why does Western medicine fail to cure chronic physical and mental illness Why do so many treatments and drugs work only for a limited time before eventually losing effectiveness or producing harmful side effects Dr Steven Goldsmith s answer is at once counterintuitive and commonsensical the root of the problem is our combative approach Instead of resisting and fighting our ailments we should cooperate with and even embrace them We should look for and apply treatments that are integrated with the causes of illness not regard illness as an enemy to conquer This hair of the dog principle is already widely evident in practice Take for example vaccines and inoculations which are small doses of the microbes that cause the diseases being prevented the use of the stimulant Ritalin to calm and ground people with Attention Deficit Hyperactivity Disorder and radiation which is both a well known cause of cancer and a well known method of treating it These are just a few of Goldsmith s many examples which he relays in clear evocative and thought provoking language Perhaps most compelling of all he explores reasons why this clearly effective principle is ignored by Western medicine Drawing on fascinating case studies and personal experiences from his forty year career as a medical doctor and psychiatrist as well as abundant clinical experimental and public health data that support his seemingly paradoxical assertion Dr Goldsmith presents an exciting revolutionary approach that will change the way you think about medicine and psychotherapy     **Fundamental Research in Ultra High Dilution and Homoeopathy** J.
