sexual activity and sexual enjoyment is the norm John Grube's paper on the interaction of older gay men with younger gay liberationists explores the cultural divide between today's older gay man and his younger counterpart filling a gap left in the first edition And a concluding chapter by Richard Friend on a theory of successful gay aging summarizes much of the current thinking about this topic The true situation of the older homosexual male presented in *Gay and Gray* challenges preconceptions about what it means to be old and gay It asserts that in most ways older gay men are indistinguishable from other older people Because the book portrays older gay men in a realistic and sympathetic light it is therapeutic for the many gay men who have been burdened with society's negative and distorted views about them These men may compare their own lives to those of the respondents described in the book *Gay and Gray* offers younger gay men a rare glimpse into their futures and enlightens and comforts those who count older gay men among their family and friends The conclusions drawn in the book will change people's perspectives and offer new ways of thinking for and about older gay men *Gay and Gray* is filled with rich case histories and treats its subject with dignity and compassion Topics of focus include love relationships social and psychological adjustment gay community self acceptance being in the closet and coming out as a gay person intergenerational attitudes popular stereotypes As the first intensive interview and questionnaire study of gay men aged 40 and older in America *Gay and Gray* examines the lives of these men in light of cultural stereotypes Author Berger asks about the social lives of these men their involvement in both the heterosexual and homosexual communities their coming out experiences their attitudes about younger gays their experiences in growing older and their strategies for adapting to life's challenges In the study Berger reveals that contrary to stereotypic views most older gay men are well integrated into social networks and lead active and generally satisfying lives He found that few live alone most scored as well as younger gays on measures of psychological adjustment such as self acceptance many are open about their homosexuality with family friends and colleagues and the most well adjusted older gay men were integrated into a homosexual community associated with younger gay men and were unwilling to change their sexual orientation
