Unveiling the Whale Arne Kalland, 2009-10-01 Whaling has become one of the most controversial environmental issues It is not that all whale species are at the brink of extinction but that whales have become important symbols to both pro and anti whaling factions and can easily be appropriated as the common heritage of humankind This book the first of its kind is therefore not about whales and whaling per se but about how people communicate about whales and whaling It contributes to a better understanding and discussion of controversial environmental issues Why and how are issues selected How is knowledge on these issues produced and distributed by organizations and activists And why do affluent countries like Japan and Norway still support whaling which is of insignificant economic importance Basing his analysis on fieldwork in Japan and Norway and at the International Whaling Commission the author argues how an image of a superwhale has been constructed and how this

image has replaced meat and oil as the important whale commodity He concludes that the whaling issue provides an arena where NGOs and authorities on each side can unite swapping political legitimacy and building personal relations that can be useful on issues where relations are less harmonious

Planet Ocean Michel Odent, 2021-06-04 After introducing the concept of the birthing pool in the 1970s Michel Odent has continuously expanded his interest in the mysterious connections between humans and water In *Planet Ocean* he shows that the evolution of the oceans particularly the fluctuations of sea levels and the evolution of humans are inseparable The oceans are the givers and sustainers of life holding ninety five per cent of the planet's habitable space within their immense depths Odent steers us towards a radically new vision of human nature Our defining feature a supersized brain becomes a leitmotif that enables links between topics as diverse as our nutritional needs our relationship with sea mammals and the way members of our species give birth He relates transcendent emotional states with what the French writer Romain Rolland referred to as the oceanic feeling both suggesting

the absence of limits Access to such states can be associated with for example a foetus ejection reflex This leads to the extraordinary conclusion that swimming as learnt behaviour among humans the birth process and access to transcendence are interrelated topics for students of human nature Planet Ocean is a fascinating interdisciplinary study that demonstrates our manifold connections to water and suggests their relevance to everyday life **Unsolved Mysteries of the Sea** Patricia Fanthorpe,2004-03-01 Seas and oceans cover most of the Earth s surface yet we know less about what lies beneath them than we do about stars and planets millions of miles away The seas are filled with intriguing mysteries How were they formed What gave rise to stories of sirens mermaids and mermen Where did the old pirates and buccaneers hide their treasure The answers to these questions and more can be found in Unsolved Mysteries of the Sea **Souls in the Sea** Scott Taylor,2003-02-21 Dolphins have long been attributed with intelligence but do they have souls Self awareness Compassion Scott Taylor Director of the Cetacean Studies Institute investigates the history mythology and science surrounding these creatures and emerges with a resounding yes And not only do whales and dolphins merit our attention and respect in their own right they are an index to what our future as a species can be In this multi faceted cetology compendium Taylor surveys the portrayal of dolphins and whales in works of literature as disparate as Moby Dick and Sumerian legend examines biologist John Lilly s research on interspecies communication and explores the benefits of dolphin assisted swimming therapy for disabled children and adults Looking at the world from the perspective of one of these souls in the sea Taylor suggests that cetaceans are an ideal bridge between humanity and nature Poetically written and thoughtfully illustrated with photos and drawings Souls in the Sea is a comprehensive celebration of the biology history and mystique of dolphins and whales

Dream Time Sarah Starr,2013 It is the 1970 s when Rachel takes a gap year from university As today the world is reaching towards global peace but Rachel finds her own demons in Australia Stranded at the monsoon end of the continent she tries to study but her life soon becomes like a nightmare Trapped she dreams of escape She learns how the ancient Aborigines lived a wise walking dream living in harmony with nature and the Earth But old scores are waiting to be settled and it could be Rachel who has to pay Will she wake up in time to remember who she really is and why she has been led to this strange new world Join the enigmatic tale of love birth murder and how a whole culture was betrayed How for one woman the recognition of her inherent connection brought freedom Dare to believe in miracles The time to live The Dream is here Between Species Toni Frohoff,Brenda Peterson,2003 Since ancient times the kinship between dolphins and humans has been celebrated across cultures and continents in myth art literature and science Only recently however have we gone beyond our own view of this interspecies connection and begun to ask What might this bond look like from the dolphins perspective This anthology brings together for the first time eminent scientists and gifted writers to help shed light on this intriguing question Selections range from tales of transforming dolphin encounters to views on how to protect cetaceans and their habitats and from poems honoring dolphins to provocative critiques of swim with the dolphins programs and acoustic
