Where the Money Was Willie Sutton, Edward Linn, 2004-03-23 The Broadway Books Library of Larceny Luc Sante General Editor For more than fifty years Willie Sutton devoted his boundless energy and undoubted genius exclusively to two activities at which he became better than any man in history breaking in and breaking out The targets in the first instance were banks and in the second prisons Unarguably America s most famous bank robber Willie never injured a soul but took on almost a hundred banks and departed three of America s most escape proof penitentiaries This is the stuff of myth rascally and cautionary by turns yet true in every searing diverting and brilliantly recalled detail *1 Peter MacArthur New Testament Commentary* John MacArthur, 2004-06-01 Peter wrote this letter at the outbreak of Nero s persecution urging his readers to have hope and courage in the midst of terrible affliction His words of encouragement still resonate today Even when believers face suffering and hostility they can rest in their salvation live out their testimony and look forward to Jesus return Join John MacArthur as he explains each verse in a way that is both doctrinally precise and intensely practical

Schizoanalysis and Animal Science Education Helena Pedersen, 2019-02-07 Within the education system acts of violence toward animals take place and are manifested on a routine basis in science classes in lecture halls in school canteens and during study visits to zoos farms and slaughterhouses Taken for granted as necessary for teaching and learning this violence profoundly affects animals as well as students It also provides new entry points for understanding education as a multispecies power regime driven by numerous other investments than knowledge dissemination alone What then is the nature of this educational violence and how exactly does education work through techniques of interference with student and animal bodies Based on ethnographic research within upper secondary schools and higher education this book challenges the use of animals in education by innovative engagement of Deleuze and Guattari s tool of schizoanalysis Sparking a fundamental rethinking of educational processes relations and aims the book explores how scientific knowledge about animals proliferates through complex interplay of power and desire in contested spaces of teaching and learning Configuring animal science education as a set of machines working in tandem with the animal industry Helena Pedersen offers radical new insights into how education forms subjectivities and social orders under conditions of capitalist expansion that capture students and animals alike Bringing together education studies science studies critical animal studies and continental philosophy Pedersen also provides examples of disruptive action that can put education to work for transformation and liberation Animal Damage Control Act of 1980 United States.
