Managing Organizations for Sustainable Development in Emerging Countries Angappa Gunasekaran, Charbel José Chiappetta Jabbour, Ana Beatriz Lopes de Sousa Jabbour, 2017-10-02. Managing Organizations for Sustainable Development in Emerging Countries focuses on the main challenges and opportunities of managing firms and emerging economies in the light of sustainable development. One of the key questions of sustainable development is how organizations from developing countries are achieving their economic goals while considering simultaneously environmental issues like conservation of natural resources, eco efficiency, biodiversity conservation and climate change mitigation. These questions are relevant for government, industry and urban sustainability. However, in the modern literature that discusses organizational management for sustainable development, few studies focus on the reality of organizations from emerging countries. Moreover, changing environmental legislation in emerging countries such as China and Brazil will affect organizational managers. In this context, this book may contribute to organizational management in the search for more sustainable organizations as well as deal with the challenges of managing organizations in the context of increased social problems, degradation of natural resources, loss of biodiversity and climate change. This book was published as a special issue of the International Journal of Sustainable Development World Ecology. **From Economic Growth to Eco Development** Jagdish Singh, 1991. **Environment, Energy and Sustainable Development** Wen-Pei Sung, Jimmy C.M.
