Myth in Modern Media Management and Marketing Kreft, Jan, Kuczamer-Kłopotowska, Sylwia, Kalinowska-Żeleźnik, Anna, 2019-06-14 The development of communication technology and the proliferation of centers that collect interpret and transmit information does not mean that communities have become a more transparent and enlightened environment If anything the pioneering research of modern communication signifies the ambiguity of individual and collective existence

Clark,2012-06-01 Richard Clark s observation that media are mere vehicles that deliver instruction but do not influence student achievement any more than the truck that delivers our groceries causes changes in our nutrition is as misunderstood today as it was when first published in the Review of Educational Research in 1983 The convincing if little read scientific evidence presented by Clark has divided the field and caused considerable concern especially among the providers of newer media for learning A collection of writings about the media effects debate as it has come to be called was published in 2001 Edited by Clark Learning From Media was the first volume in the series Perspectives in Instructional Technology and Distance Education The series editors are convinced that the writings of Clark and those who take issue with his position are of critical importance to the field of instructional technology Thus a revised second edition of Learning From Media is now being offered The debate about the impact of media on learning remains a fundamental issue as new mediated approaches to teaching and learning are developed and Clark s work should be at the center of the discussion The critical articles on both sides of this debate are contained in Learning From Media 2nd Edition **Metaphor and Gender in Business Media**

Discourse V. Koller,2004-05-25 This new study reconciles cognitive metaphor theory with Critical Discourse Analysis to offer a fresh approach to the study of metaphor In applying this framework to a substantial corpus of texts from business magazines the author shows how metaphors of war sports and evolutionary struggle are used to construct business as a masculinized social domain In view of the subtle but pervasive socio cognitive impact of these metaphors the study raises the question of possible alternatives and the scope for change in business media discourse Media, Society, World Nick

Couldry,2013-08-29 Media are fundamental to our sense of living in a social world Since the beginning of modernity media have transformed the scale on which we act as social beings And now in the era of digital media media themselves are being transformed as platforms content and producers multiply Yet the implications of social theory for understanding media and of media for rethinking social theory have been neglected never before has it been more important to understand those implications This book takes on this challenge Drawing on Couldry s fifteen years of work on media and social theory this book explores how questions of power and ritual capital and social order and the conduct of political struggle professional competition and everyday life are all transformed by today s complex combinations of traditional and new media In the concluding chapters Couldry develops a framework for global comparative research into media and for thinking collectively about the ethics and justice of our lives with media The result is a book that is both a major intervention in the field and
