History of Science, History of Text Karine Chemla, 2004 This book explores the hypothesis that the types of inscription or text used by a given community of practitioners are designed in the very same process as the one producing concepts and results The book sets out to show how in exactly the same way as for the other outcomes of scientific activity all kinds of factors cognitive as well as cultural technological social or institutional conjoin in shaping the various types of writings and texts used by the practitioners of the sciences To make this point the book opts for a genuinely multicultural approach to the texts produced in the context of practices of knowledge It is predicated on the conviction that in order to approach any topic in the history of science from a theoretical point of view it may be fruitful to consider it from a global perspective The book hence does not only gather papers dealing with geometrical papyri of antiquity sixteenth century French books in algebra seventeenth century scientific manuscripts and paintings eighteenth and nineteenth century memoirs published by European academies or scientific journals and Western Opera Omnia It also considers the problems of interpretation relating to reading Babylonian clay tablets Sanskrit oral scriptures and Chinese books and illustrations Thus it enables the reader to explore the diversity of forms which texts have taken in history and the wide range of uses they have inspired This volume will be of interest to historians philosophers of science linguists and

Tropical Medicine in the Twentieth Century Helen J. Power,2012-11-12 First published in 1998 Despite the upsurge of
 interest in the history of tropical medicine international public health and the provision of health care in colonial and post
 colonial tropical countries no major text discusses the history of the academic discipline in the twentieth century In Britain
 the two Schools of Tropical Medicine opened within six months of each other in the final year of the nineteenth century They
 have played a pivotal role in developing tropical medicine as an academic discipline in postgraduate medicine with an active
 research profile The Schools also affected the development of health care in the tropical colonies They trained the Medical
 Officers of the Colonial Medical Service and the indigenous doctors whose training failed to include infectious endemic
 diseases and lacked an emphasis on community health The Schools also contributed to a body of knowledge applied by the
 colonial powers international agencies and independent nation states as part of their health care programmes Ultimately the
 Schools helped the developing world to establish its own priorities for health This volume charts the history of the Liverpool
 School of Tropical Medicine from1898 to1990 My Century in History Thomas D. Clark,2006-08-04 When Thomas D Clark
