Perfect Figures Bunny Crumpacker, 2007-08-07 Since the beginning of civilization numbers have been more than just a way to keep count Perfect Figures tells the stories of how each number came to be and what incredible associations and superstitions have been connected to them ever since Along the way are some of the great oddities of numbers past as a time when finger counting was a sign of intelligence the Venerable Bede could count to a million on his hands the medieval Algorists who were burnt at the stake for their use of Arabic rather than Roman numerals the Bank of England which stubbornly kept accounts on notched wooden sticks until 1826 Filled with Crumpacker's eloquent wit and broad intelligence Perfect Figures brings the history of numbers to life just as Bill Bryson did for the English language in *The Mother Tongue*

Mechanics and Thermodynamics Wolfgang Demtröder, 2017-02-06 This introduction to classical mechanics and thermodynamics provides an accessible and clear treatment of the fundamentals Starting with particle mechanics and an early introduction to special relativity this textbook enables the reader to understand the basics in mechanics The text is written from the experimental physics point of view giving numerous real life examples and applications of classical mechanics in technology This highly motivating presentation deepens the knowledge in a very accessible way The second part of the text gives a concise introduction to rotational motion an expansion to rigid bodies fluids and gases Finally an extensive chapter on thermodynamics and a short introduction to nonlinear dynamics with some instructive examples intensify the knowledge of more advanced topics Numerous problems with detailed solutions are perfect for self study

Folk-tales of Salishan and Sahaptin tribes F. Boas, *The History and Practice of Ancient Astronomy* James Evans, 1998-10-01 The History and Practice of Ancient Astronomy combines new scholarship with hands on science to bring readers into direct contact with the work of ancient astronomers While tracing ideas from ancient Babylon to sixteenth century Europe the book places its greatest emphasis on the Greek period when astronomers developed the geometric and philosophical ideas that have determined the subsequent character of Western astronomy The author approaches this history through the concrete details of ancient astronomical practice Carefully organized and generously illustrated the book can teach readers how to do real astronomy using the methods of ancient astronomers For example readers will learn to predict the next retrograde motion of Jupiter using either the arithmetical methods of the Babylonians or the geometric methods of Ptolemy They will learn how to use an astrolabe and how to design sundials using Greek and Roman techniques The book also contains supplementary exercises and patterns for making some working astronomical instruments including an astrolabe and an equatorium More than a presentation of astronomical methods the book provides a critical look at the evidence used to reconstruct ancient astronomy

It includes extensive excerpts from ancient texts meticulous documentation and lively discussions of the role of astronomy in the various cultures Accessible to a wide audience this book will appeal to anyone interested in how our understanding of our place in the universe has changed and developed from ancient times through the Renaissance *NASA Technical Note*, 1967

Space, Place and Religious Landscapes Darrelyn Gunzburg, Bernadette Brady, 2020-10-01 Exploring sacred mountains around the world this book examines whether bonding and reverence to a mountain is intrinsic to the mountain constructed by people or a mutual encounter Chapters explore mountains in England Scotland Wales Italy Ireland the Himalaya Japan Greece USA Asia and South America and embrace the union of sky landscape and people to examine the religious dynamics between human and non human entities This book takes as its starting point the fact that mountains physically mediate between land and sky and act as metaphors for bridges from one realm to another recognising that mountains are relational and that landscapes form personal and group cosmologies The book fuses ideas of space place and material religion with cultural environmentalism and takes an interconnected approach to material religio landscapes In this way it fills the gap between lived religious traditions personal reflection phenomenology historical context environmental philosophy myths and performativity In defining material religion as active engagement with mountain forming and humanshaping landscapes the research and ideas presented here provide theories that are widely applicable to other forms of material religion

Women in Chinese Martial Arts Films of the New Millennium Ya-chen Chen, 2012-01-01 Women and Gender in Chinese Martial Arts Films of the New Millennium by Ya chen Chen is an excavation of underexposed gender issues focusing mainly on contradictory and troubled feminism in the film narratives In the cinematic world of martial arts films one can easily find representations of women of Ancient China released from the constraints of patriarchal social order to revel in a dreamlike space of their own They can develop themselves protect themselves and even defeat or conquer men This world not only frees women from the convention of foot binding but it also unbinds them in terms of education critical thinking talent ambition opportunities to socialize with different men and the freedom or right to both choose their spouse and decide their own fate Chen calls this phenomenon Chinese cinematic martial arts feminism The liberation is never sustaining or complete however Chen reveals the presence of a glass ceiling marking the maximal exercise of feminism and women s rights which the patriarchal order is willing to accept As such these films are not to be seen as celebrations of feminist liberation but as enunciations of the patriarchal authority that suffuses Chinese cinematic martial arts feminism The film narratives under examination include *Crouching Tiger Hidden Dragon* directed by Ang Lee *Hero* Zhang Yimou *House of the Flying Daggers* Zhang Yimou *Seven Swords* Tsui Hark *The Promise* Chen Kaige *The Banquet* Feng Xiaogang and *Curst of the Golden Flower* Zhang Yimou Chen also touches upon the plots of two of the earliest award winning Chinese martial arts films *A Touch of Zen* and *Legend of the Mountain* both directed by King Hu
