What Is the Role of Learning and Multisensory Interactions? Guillaume Andéol, Brian D. Simpson, Ewan A. Macpherson, 2016-08-29 Spatial hearing ability has been found to vary widely across listeners A survey of the existing auditory space perception literature suggests that three main types of factors may account for this variability physical factors e.g. acoustical characteristics related to sound localization cues perceptual factors e.g. sensory cognitive processing perceptual learning multisensory interactions and methodological factors e.g. differences in stimulus presentation methods across studies However the extent to which these and perhaps other still unidentified factors actually contribute to the observed variability in spatial hearing across individuals with normal hearing or within special populations e.g. hearing impaired listeners remains largely unknown Likewise the role of perceptual learning and multisensory interactions in the emergence of a multimodal but unified representation of auditory space is still an active topic of research A better characterization and understanding of the determinants of inter individual variability in spatial hearing and of its relationship with perceptual learning and multisensory interactions would have numerous benefits In particular it would enhance the design of rehabilitative devices and of human machine interfaces involving auditory or multimodal space perception such as virtual auditory multimodal displays in aeronautics or navigational aids for the visually impaired For this Research Topic we have considered manuscripts that present new methods or review existing methods for the study of inter individual differences present new data or review existing data concerning acoustical features relevant for explaining inter individual differences in sound localization performance present new or review existing psychophysical or neurophysiological findings concerning spatial hearing and or auditory perceptual learning and or multisensory interactions in humans normal or

impaired young or older listeners or other species discuss the influence of inter individual differences on the design and use of assistive listening devices rehabilitation or human machine interfaces involving spatial hearing or multimodal perception of space ergonomy Role of Inflammation in Neurodegenerative Diseases Maya Koronyo-Hamaoui, Sally Ann

Frautschy, Jorge Ivan Alvarez, 2022-07-13 **Intracranial Stereotactic Radiosurgery** Jason P. Sheehan, 2021-12-22 In this third edition of Intracranial Stereotactic Radiosurgery Drs Sheehan and Lunsford provide an updated assessment of the practice of stereotactic radiosurgery Topics include benign and malignant tumors cerebrovascular abnormalities and functional disorders Several new topics are now included and focus on immunotherapy hypofractionation and repeat radiosurgery Each chapter contains key figures and tables to illustrate the critical concepts of the work Contributors to the book represent many of the most prestigious stereotactic radiosurgery centers across the world This book is comprised of 36 chapters and represents a comprehensive update to prior editions It is intended to be a readable credible and accessible reference on stereotactic radiosurgery Editors Jason Sheehan MD PhD FACS FAANS is the Vice Chair and Harrison Distinguished Professor of Neurological Surgery at the University of Virginia UVA He also serves as the Neurosciences Service Line Director at UVA Dr Sheehan is the current chair of the American Association of Neurological Surgeons AANS and Congress of Neurological Surgeons CNS Section on Tumors He serves as the Editor In Chief of the Journal of Neuro Oncology L Dade Lunsford MD serves as the Lars Leksell Professor and Distinguished Professor at the Department of Neurological Surgery at the University of Pittsburgh He is also director of the Center for Image Guided Neurosurgery at the University of Pittsburgh Medical Center and an internationally recognized authority on stereotactic surgery radiosurgery and minimally invasive surgery He has authored or coauthored more than 1 000 scientific reports and 16 books Theory and Technology of Laser Imaging Based Target Detection Yihua Hu, 2017-06-23 This book systematically introduces readers to laser imaging target detection principles and techniques It covers the fundamentals of laser imaging and presents an extensive up to date analysis of how to best use laser imaging to detect targets This is followed by a comprehensive discussion of laser imaging target detection principles laser imaging generation and target detection methods The book offers an invaluable resource for researchers especially those who are engaged in the fields including target detection based on a laser imaging system target detection and identification remote sensing imaging and image processing Additionally it can be used as a reference book for advanced undergraduates and postgraduates of relevant majors **Stacked Antennas** Ankita Malhotra, Ananjan Basu, 2024-12-12 The text focuses primarily on details related to design concepts of stacked microstrip antennas performance characteristics and complete static analysis based on different approaches It will further provide readers with an in depth understanding of static analysis approaches for analyzing and understanding the performance of multi layered stacked antennas The book covers important topics such as conformal mapping the transmission line equivalent model based approach and the microstrip patch antenna model The book also discusses

reconfigurable stacked microstrip antennas stacked microstrip antenna arrays and a wide range of potential applications of stacked microstrip antennas This book Presents systematic and simplified design steps of stacked antennas the factors involved and various design examples and explains static analysis of multi layered stacked antennas in an easy to understand manner Discusses topics such as conformal mapping the transmission line equivalent model based approach and the microstrip patch antenna model and reconfigurable stacked microstrip antennas and their applications along with briefly discussing the design concepts of stacked microstrip antenna arrays Covers simulation design concepts and measurement techniques for stacked microstrip antennas Illustrates microstrip stacked antenna parameters including bandwidth polarization radiation pattern gain directivity and efficiency Focuses on covering a wide range of potential applications of stacked microstrip antennas It is primarily written for senior undergraduates graduate students and academic researchers in fields including electrical engineering electronics and communications engineering

Artificial Neural Networks in Vehicular Pollution Modelling Mukesh Khare,S.M. Shiva Nagendra,2006-10-24 This book provides a step by step procedure for formulation and development of Artificial Neural Networks based Vehicular pollution models It takes into account meteorological and traffic aspects The book will be useful for professionals and researchers working in problems associated with urban air pollution management and control

Proceedings of 2021 International Conference on Autonomous Unmanned Systems (ICAUS 2021) Meiping Wu,Yifeng Niu,Mancang Gu,Jin Cheng,2022-03-18 This book includes original peer reviewed research papers from the ICAUS 2021 which offers a unique and interesting platform for scientists engineers and practitioners throughout the world to present and share their most recent research and innovative ideas The aim of the ICAUS 2021 is to stimulate researchers active in the areas pertinent to intelligent unmanned systems The topics covered include but are not limited to Unmanned Aerial Ground Surface Underwater Systems Robotic Autonomous Control Navigation and Positioning Architecture Energy and Task Planning and Effectiveness Evaluation Technologies Artificial Intelligence Algorithm Bionic Technology and Its Application in Unmanned Systems The papers showcased here share the latest findings on Unmanned Systems Robotics Automation Intelligent Systems Control Systems Integrated Networks Modeling and Simulation It makes the book a valuable asset for researchers engineers and university students alike

Geological Disaster Monitoring Based on Sensor Networks Tariq S. Durrani,Wei Wang,Sheila M Forbes,2018-08-09 This book presents the outcomes of the workshop sponsored by the National Natural Sciences Foundation of China and the UK Newton Fund British Council Researcher Links The Workshop was held in Harbin China from 14 to 17 July 2017 and brought together some thirty young postdoctoral researchers from China and the UK specializing in geosciences sensor signal networks and their applications to natural disaster recovery The Workshop presentations covered the state of the art in the area of disaster recovery and blended wireless sensor systems that act as early warning systems to mitigate the consequences of disasters and function as post disaster recovery vehicles This book promotes knowledge transfer and helps

readers explore and identify research opportunities by highlighting research outcomes in the internationally relevant area of disaster recovery and mitigation

Fundamentals of Artificial Neural Networks Mohamad H. Hassoun, 1995 A systematic account of artificial neural network paradigms that identifies fundamental concepts and major methodologies Important results are integrated into the text in order to explain a wide range of existing empirical observations and commonly used heuristics

Spatial Cognition Christian Freksa, Christopher Habel, Karl F. Wender, 2003-05-20 Research on spatial cognition is a rapidly evolving interdisciplinary enterprise for the study of spatial representations and cognitive spatial processes be they real or abstract human or machine Spatial cognition brings together a variety of search methodologies empirical investigations on human and animal orientation and navigation studies of communicating spatial knowledge using language and graphical or other pictorial means the development of formal models for representing and processing spatial knowledge and computer implementations to solve spatial problems to simulate human or animal orientation and navigation behavior or to reproduce spatial communication patterns These approaches can interact in interesting and useful ways Results from empirical studies call for formal explanations both of the underlying memory structures and of the processes operating upon them we can develop and implement operational computer models obeying the relationships between objects and events described by the formal models we can empirically test the computer models under a variety of conditions and we can compare the results to the results from the human or animal experiments A disagreement between these results can provide useful indications towards the refinement of the models

Grammatical Inference Colin de la Higuera, 2010-04-01 The problem of inducing learning or inferring grammars has been studied for decades but only in recent years has grammatical inference emerged as an independent field with connections to many scientific disciplines including bioinformatics computational linguistics and pattern recognition This book meets the need for a comprehensive and unified summary of the basic techniques and results suitable for researchers working in these various areas In Part I the objects of use for grammatical inference are studied in detail strings and their topology automata and grammars whether probabilistic or not Part II carefully explores the main questions in the field What does learning mean How can we associate complexity theory with learning In Part III the author describes a number of techniques and algorithms that allow us to learn from text from an informant or through interaction with the environment These concern automata grammars rewriting systems pattern languages or transducers

The Emerging Spatial Mind Jodie M. Plumert, John P. Spencer, 2007-04-12 How does the spatial mind develop In this book Jodie Plumert and John Spencer bring together the leading researchers from the field of spatial cognitive development to examine how the spatial mind emerges from its humble origins in infancy and becomes its mature flexible and skilled adult form The work presented sheds light on how the emerging spatial mind is fostered and shaped over time by our experiences of thinking about and interacting in the space around us Each chapter presents cutting edge research and theory that addresses the two pivotal questions of what changes in the spatial mind and how these changes

come about The authors provide both conceptual and formal theoretical accounts of developmental process at multiple levels of analysis genes neurons behaviors social interactions creating a contemporary overview of the general mechanisms of cognitive change Commentary chapters show how the developmental advances discussed in these accounts fit into our understanding of not only spatial cognitive development but also spatial cognition more generally

Image and Video Retrieval Wee-Kheng Leow, Michael S. Lew, Tat-Seng Chua, Wei-Ying Ma, Lekha Chaisorn, Erwin M. Bakker, 2007-05-22 It was our great pleasure to host the 4th International Conference on Image and Video Retrieval CIVR at the National University of Singapore on 20-22 July 2005 CIVR aims to provide an international forum for the discussion of research challenges and exchange of ideas among researchers and practitioners in image video retrieval technologies It addresses innovative research in the broad field of image and video retrieval A unique feature of this conference is the high level of participation by researchers from both academia and industry Another unique feature of CIVR this year was in its format it offered both the traditional oral presentation sessions as well as the short presentation cum poster sessions The latter provided an informal alternative forum for animated discussions and exchanges of ideas among the participants We are pleased to note that interest in CIVR has grown over the years The number of submissions has steadily increased from 82 in 2002 to 119 in 2003 and 125 in 2004 This year we received 128 submissions from the international communities with 81.63% from Asia and Australia 25.19% from Europe and 22.17% from North America After a rigorous review process 20 papers were accepted for oral presentations and 42 papers were accepted for poster presentations In addition to the accepted submitted papers the program also included 4 invited papers 1 keynote industrial paper and 4 invited industrial papers Altogether we offered a diverse and interesting program addressing the current interests and future trends in this area

Antibiotic-resistant Bacteria Patrick Guilfoile, I. Edward Alcamo, 2007 This continuing series explores different diseases to show the science behind how disease causing organisms affect the body Microorganisms have plagued humans since the beginning of time causing debilitating diseases and even death But how exactly do these microorganisms infect and cause disease The books in this series examine various microbiological scourges that have affected humans as well as the steps that have been taken to identify isolate prevent and eradicate them Each title will outline the history and treatments of the diseases highlighting how improvements in prevention and treatment techniques have affected the disease's impact on the world population

Eye Movement Research Christoph Klein, Ulrich Ettinger, 2019-10-16 This edited volume presents fundamentals as well as applications of oculomotor methods in industrial and clinical settings The topical spectrum covers 1 basics and background material 2 methods such as recording techniques markov models Levy flights pupillometry and many more as well as 3 a broad range of applications in clinical and industrial settings The target audience primarily comprises research experts and practitioners but the book may also be beneficial for graduate students
