The EDCF Guide to Digital Cinema Production Lars Svanberg, 2013-06-26. A professional introduction to the end-to-end process of digital filmmaking. The EDCF Guide to Digital Cinema Production sheds light on the ongoing and confusing transition from analog to digital technology in film production. In addition to a complete analysis of technical concerns, this text deals with a number of issues where European and Hollywood priorities differ. It adds fuel to the discussion on Photo Chemical Fundamentalism and the future of traditional film-based cinematography. With special emphasis on new HD production techniques for the big cinema screen, this guide is the one and only resource available from a European perspective. The EDCF Guide to Digital Cinema Production provides film professionals and decision makers in European cinema with an excellent basis for discussions on how to handle the transition from analog to digital technology. Look no further for several production case studies among them Ingmar Bergman's last film *Saraband* 2003 and Lars von Trier's *Dogville* 2003. Surveys of HD Systems, Cameras and The 37 MFAQ on HD Production. Expert reports on Audio Recording for HD and the Digital Intermediate Process. Detailed European initiatives in Digital Cinema. An up-to-date survey of the problematic standards situation for Digital Cinema. A comprehensive look at archiving, the Achilles Heel of digital production. The pros and cons of producing feature films digitally, a unique and professional view of the agony and ecstasy. Editor in Chief Lasse Svanberg is a founding member of EDCF. He was DoP on 14 feature films, 1966-81, founded *TM Technology* magazine at the Swedish Film Institute in 1968 and was its Chief Editor until 1998. He was elected Fellow of BKSTS 1979, Fellow of SMPTE 1995 and granted Professor's title by the Swedish Government 2002. He is the author of six books on the history and possible future of film, video and television. The European Digital Cinema Forum (EDCF) was constituted in June 2001 as a joint Swedish-British-French effort to establish a European forum for discussions, information exchange and industrial activities in the field of Digital Cinema. This project was initiated because digital production, digital distribution and digital exhibition of film is the most radical technical change facing the film industry since sound film was introduced.

Dialogue Editing for Motion Pictures John Purcell, 2012-11-12. Dialogue editing is a crucial yet invisible part of filmmaking. Do it right and no one notices. Do it wrong and your film or video sounds messy, distracting and unrealistic. This is a book for people who need to edit production sound for film, TV or video but were never taught how to do it. It goes step by step through the process and covers all the workflows you are likely to encounter. Efficient working practices are emphasized throughout so you learn to save time and avoid needless repetition. Many dialogue editors are hobbled by a lack of understanding of the non-sound aspects of filmmaking. Unlike editors who cut effects backgrounds or Foley, a dialogue editor's work is directly affected by what has gone on before. How a film was shot, recorded and edited will dramatically influence the dialogue editing process.

Much of this book then deals with things which at first glance don't appear to be dialogue. You will find overviews of film picture and sound postproduction, film tape, NTSC, PAL, 24p and HD. There are summaries of film picture editing, OMF manipulation and ADR management. Dialogue Editing for Motion Pictures John Purcell, 2012-11-12.
