Ventrella,2001-06-24 One of the most powerful forces in business today is the positive psychology movement overcoming self defeating attitudes and developing our talents and positive traits Much of the new thinking in fact stems directly from the concepts in Norman Vincent Peale's great classic bestseller The Power of Positive Thinking which has been translated into forty two languages and has sold over 22 million copies Now after years of extensive research and field testing working in cooperation with the Peale Center and major corporations nationwide Scott Ventrella

has adapted those concepts into a systematic program for people in business to achieve greater levels of personal and professional performance. *The Power of Positive Thinking in Business* provides a practical way for each of us to develop and actually strengthen the ten traits of a positive thinker. Inevitably, our performance rises to new levels when we learn how to overcome negative attitudinal barriers such as fear, lack of self-confidence, and low self-esteem, and instead develop the traits that characterize a positive thinker: optimism, enthusiasm, belief, integrity, courage, confidence, determination, patience, calmness, and focus. *The Power of Positive Thinking in Business* encourages us to concentrate on objective, rational thinking instead of self-limiting beliefs and negative self-talk. The result is an increased ability to deal effectively with tough situations and difficult people in both business environments and personal lives. Together, rational thinking and the ten traits of a positive thinker can turn defeatist behavior into productive actions that will overcome the toughest of challenges with powerful, positive results. Best of all, these practical yet powerful concepts are applicable to businesspeople at all levels, disciplines, and functions within an organization and have been adapted to appeal to people of all faiths.

*Gain Competitive Advantage* Kgadi Mmanakana, 2022-08-15

How many times do we persist to force something to work that we already know won't work? Like holding views, leadership styles, and culture that no longer serve our workforce and businesses? How many times do we conform to being stuck in the rut, the bare minimum, and the comfortable zone over restructuring the organizations to make things work, stopping the production of a product that is a nice-to-have, a money bleeder, and investing in what will give sustainable returns? Sometimes to save yourself your business, you will need to do the hard things. Most people and businesses didn't swiftly adapt to the Covid-19 induced disruption. There were tears that were shed, short-term mistakes and losses made, anxiety and gut-wrenching fear experienced. However, that knowing that that was going to be the New Normal enabled them to do it afraid. And that's bravery. Leading at the edge of chaos through crisis and recessions is not easy. Changing organizational culture, which at times gets you face-to-face with your own biases and ineffective outlook, is not easy. For a person who's used to having the final say, it is not easy to allow your workforce to be entrepreneurial and let their innovative ideas catch fire. For an ever-solo entrepreneur, it may not be easy to start delegating and losing control. All these necessary calls for change and transformation require you to be brave and courageous. They require brave leadership and courageous culture. In *Gain Competitive Advantage*, the author Kgadi Mmanakana introduces brave leadership and courageous culture as the birthplace of competitive advantage and shares 10 practical strategies that business leaders, team leaders, managers, divisional directors, and executives can use to unlock employee engagement, drive team performance, and build resilience to maintain relevance in a constantly changing world.
