High Latitude Climate And Remote Sensing:

High Latitude Climate and Remote Sensing Kirill I. Kovlevich Kondrat'ev, Ola M. Johannessen, Vladimir Vladimirovich Melent'ev, 1996 A comprehensive treatment of the microwave remote sensing techniques used to monitor alterations in the climate at high latitudes as a principal indicator of larger global climate change Two Russian scientists and one from Norway present original research much of it published for the first time in **Remote Sensing of Environmental Changes in Cold Regions** Jinyang Du, Jennifer D. Watts, Hui Lu, Lingmei Jiang, Paolo Tarolli, 2019-11-14 This Special Issue gathers papers reporting recent advances in the remote sensing of cold regions It includes contributions presenting improvements in modeling microwave emissions from snow assessment of satellite based sea ice concentration products satellite monitoring of ice jam and glacier lake outburst floods satellite mapping of snow depth and soil freeze thaw states near nadir interferometric imaging of surface water bodies and remote sensing based assessment of high arctic lake environment and vegetation recovery from wildfire disturbances in Alaska A comprehensive review is presented to summarize the achievements challenges and opportunities of cold land remote sensing *Global Climatology and Ecodynamics* Arthur Philip Cracknell, Vladimir F. Krapivin, 2008-11-04 The exclusive role of natural ecosystems is a key factor in the maintenance of the biospheric equilibrium The current global crisis is largely caused by their dramatic decline by 43% in the past hundred years Ignoring the immutable laws and limitations which determine the existence of all living things in the biosphere could lead humanity to an ecological catastrophe This book presents the ecological demographic economic and socio psychological manifestations of the global crisis and outlines the immutable laws and limitations which determine the existence of all living things in the biosphere The authors are eminently qualified to write about the problems associated with the global crisis and consider the causes behind humanity's conflict with its environment V Danilov Danilian Associate of the Russian Academy of Sciences and Russia's former Minister of the Environment and K Losev professor at Moscow State university are leading Russian ecologists and I Reyf is a journalist who specializes in ecology and global development Dr Danilov Danilian works on the economics of nature management economic and mathematical model building sustainable development theory and ecology Dr Losev is the chief researcher and head of the division of the VINITI All the authors have published numerous papers articles and books on such subjects as glaciology hydrology environment studies global change and sustainable development **OUR FRAGILE WORLD: Challenges and Opportunities for Sustainable Development - Volume I** M. K. Tolba, 2001-08-23 This publication *Our Fragile World Challenges and Opportunities for Sustainable Development* presents perspectives of several important subjects that are covered in greater detail and depth in the *Encyclopedia of Life Support Systems EOLSS* The contributions to the two volumes provide an integrated presentation of knowledge and worldviews related to the state of Earth's natural resources social resources institutional resources and economic and financial resources They present the vision and thinking of over 200 authors in support of efforts to solve the

complex problems connected with sustainable development and to secure perennial life support on The Blue Planet These contributions are holistic informative forward looking and will be of interest to a broad readership This volume presents contributions with focus on the Natural and Social Dimensions of sustainable Development in to two sections NATURAL SYSTEMS AND RESOURCES Natural Systems and Climate Change Natural Resources Management SOCIO CULTURAL ISSUES Human Security Peace and Socio Cultural issues Equity and Ethical issues Scientific and Technical Aerospace Reports ,1994 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database Arctic Research of the United States ,1992 **Remote Sensing of Precipitation** Silas Michaelides,2019-07-23 Precipitation is a well recognized pillar in global water and energy balances An accurate and timely understanding of its characteristics at the global regional and local scales is indispensable for a clearer understanding of the mechanisms underlying the Earth s atmosphere ocean complex system Precipitation is one of the elements that is documented to be greatly affected by climate change In its various forms precipitation comprises a primary source of freshwater which is vital for the sustainability of almost all human activities Its socio economic significance is fundamental in managing this natural resource effectively in applications ranging from irrigation to industrial and household usage Remote sensing of precipitation is pursued through a broad spectrum of continuously enriched and upgraded instrumentation embracing sensors which can be ground based e g weather radars satellite borne e g passive or active space borne sensors underwater e g hydrophones aerial or ship borne

Integration of Information for Environmental Security H. Gonca Coskun,H. Kerem Cigizoglu,M. Derya Maktav,2008-12-26 Water management and disasters including droughts and floods are becoming very important subjects in the international platforms This book will provide information about high technology techniques to solve important problems using remote sensing and GIS for topics such as the environmental security water resources management disaster forecast and prevention and information security *Global Ecodynamics* Kirill Y. Kondratyev,Vladimir F. Krapivin,V. P. Savinykh,Costas A. Varotsos,2012-12-06 During recent decades the stirring up of the processes of globalization practically in all spheres of present day civilization activities has aggravated and brought forth numerous problems resulting from the nature society N S interaction It has become apparent that to solve these problems it is necessary to develop new concepts and approaches to the interpretation of global environmental changes that would enable one to select the first priority directions in studies and to reliably assess the state of the nature society system NSS One of these priorities is to predict global climate change The growing interest in the problem of global climate change determined by its practical importance and by available contradictory estimates of the anthropogenic contribution to climate change necessitates a systematization of knowledge of and data on the observed climate change and causes of this change Despite an enormous amount of projects and programmes of studies of past and present climatic trends the problem of reliable prediction of future climate change remains far from being

solved Emissions to the atmosphere of greenhouse gases GHGs mainly carbon dioxide is considered as one of the main causes of an expected climate warming resulting in sufficiently negative consequences for humankind Therefore an attempt has been made in this book to construct a formalized technology to assess the level of the greenhouse effect due to anthropogenic sources of carbon dioxide as well as the effects of other gas components *The Drift of Sea Ice* Matti Leppäranta, 2011-03-22 The Second Edition of *The Drift of Sea Ice* presents the fundamental laws of sea ice drift which come from the material properties of sea ice and the basic laws of mechanics The resulting system of equations is analysed for the general properties of sea ice drift the free drift model and analytical models for ice drift in the presence of internal friction and the construction of numerical ice drift models is detailed This second edition of a much lauded work unique on this topic in the English language has been revised updated and expanded with much new information and outlines recent results in particular in relation to the climate problem mathematical modelling and ice engineering applications The current book presents the theory observations mathematical modelling techniques and applications of sea ice drift science The theory is presented from the beginning on a graduate student level so that students and researchers coming from other fields such as physical oceanography meteorology physics engineering environmental sciences or geography can use the book as a source book or self study material First the drift ice material is presented ending with the concept of ice state the relevant properties in sea ice dynamics Ice kinematics observations are widely presented with the mathematical analysis methods and thereafter come drift ice rheology to close the triangle material kinematics stress The momentum equation of sea ice is derived in detail and its general properties are carefully analysed Then follow two chapters on analytical models free drift and drift in the presence of internal friction These are very important tools in understanding the dynamical behaviour of sea ice The last topical chapter is numerical models which are the modern tool to solve ice dynamics problem in short term and long term problems The closing chapter summarises sea ice dynamics applications and the need of sea ice dynamicknowledge and gives some final remarks on the future of this branch of science *Global Ecodynamics*, 2004-07 Opening with a survey of contemporary global ecodynamics including its basic components this book goes on to discuss greenhouse effect problems in the context of global carbon cycle dynamics The coverage includes land ecosystem changes air sea exchange models high latitude environmental dynamics and a discussion of basic aspects of global environmental modelling and relevant monitoring systems The volume concludes by examining society systems with emphasis on the problems of sustainable development **Proceedings of the Fourth Atmospheric Radiation Measurement (ARM) Science Team Meeting**, 1994 *Department of the Interior and Related Agencies Appropriations for Fiscal Year 1990: Department of Education* United States. Congress. Senate. Committee on Appropriations.
