Movies and Marketing in Hollywood

High Concept:

High Concept Justin Wyatt, 1994 Steven Spielberg once said I like ideas especially movie ideas that you can hold in your hand If a person can tell me the idea in twenty five words or less it s going to make a pretty good movie Spielberg s comment embodies the essence of the high concept film which can be condensed into one simple sentence that inspires marketing campaigns lures audiences and separates success from failure at the box office This pioneering study explores the development and dominance of the high concept movie within commercial Hollywood filmmaking since the late 1970s Justin Wyatt describes how box office success always important in Hollywood became paramount in the era in which major film studios passed into the hands of media conglomerates concerned more with the economics of filmmaking than aesthetics In particular he shows how high concept films became fully integrated with their marketing so that a single phrase Just when you thought it was safe to go back in the water could sell the movie to studio executives and provide copy for massive advertising campaigns a single image or a theme song could instantly remind potential audience members of the movie and tie in merchandise could generate millions of dollars in additional income

Conflict Coverage Promotion: High Quality Or High Concept? A Multimodal Analysis of Claims-making in Conflict Coverage Promotional Spots of Al Jazeera English and CNN International

Chris Veits, 2014 Today even the war and conflict coverage of 24 hour news networks is subject to heavy promotion and part of the networks advertising and branding campaigns These commercial aspects of news production however seem to oppose concepts of journalistic quality This study analyses claims of journalistic quality and high concept in conflict coverage promotion spots and how they are linked to better understand the ideological complexes of CNN International and Al Jazeera English The findings show an equal number of quality and high concept claims with differences in the nature of the claims between the two networks Strong patterns are found in quality and high concept claims of both 24 hour television news networks The largest number appears in the visual mode The research also shows that analysing this kind of media text needs to be multimodal and that a social semiotic approach is appropriate for analysing claims making and linking in conflict coverage promotional spots

In the twenty-first century TV is changing but the last of the Time Lords has been more than ready; he's been fantastic. **Forgotten Blockbusters** Ethan

Parker, AI, 2025-02-24 **Forgotten Blockbusters** explores the intriguing phenomenon of commercially successful films that have faded from cultural memory. It investigates why some blockbusters endure while others, despite initial box office success, become forgotten footnotes in film history. The book argues that a film's legacy depends not only on artistic merit but also on its resonance with subsequent generations and adaptability to evolving cultural norms. The book examines the initial context of a film's release, the evolution of audience tastes, and the mechanics of cultural memory. For instance, a film's societal, political, and economic climate can greatly influence its initial success. **Forgotten Blockbusters** challenges traditional film history by focusing on commercially successful yet overlooked films. Beginning with a theoretical framework for understanding cinematic memory, the book presents detailed case studies of films from the 1970s to the 2000s, meticulously researched with box office data, reviews, and audience surveys. This approach provides a fresh perspective on the dynamics of cinematic success and failure, making it valuable for film enthusiasts, students, and anyone interested in popular culture.
