High School Typewriting:

Teacher's Manual of the New Rational Typewriting Rupert Pitt So Relle, 1926 **The Balance Sheet**, 1927 **The Business Educator**, 1920 **Typewriter Topics**, 1909 **Cognitive Aspects of Skilled Typewriting** W. E. Cooper, 2012-12-06 This volume marks the 75th anniversary of the publication of William Book's 1908 *The Psychology of Skill* in which typewriting received its first large scale treatment from a psychological standpoint As Book realized early on this form of human behavior is particularly well suited to testing psychological theories of complex motor skill and its acquisition presenting as it does a task that richly engages cognitive and motor components of programming yet involves a form of response output that can be readily quantified Now that typewriting is practiced so widely in workday circumstances studying this activity offers the additional prospect of practical applicability Until recently relatively few studies had been conducted on the psychology of typewriting One might speculate that this dearth of interest stemmed in part from the fact that researchers themselves rarely undertook the activity delegating it instead to the secretarial pool Psychological research on piano playing has produced a literature more sizable than the one on typewriting yet the latter activity has probably been practiced for many more total human hours in this century But contemporary developments in word processing technology have moved the typewriter into the researcher's office and in recent years interest in accompanying psychological issues has grown *Typewriter Trade Journal and the Office System*, 1921 **Topics**, 1922 **Review of Research in Typewriting** Harves Rahe, 1950 *Bulletin*, 1939 **The Gregg Writer**, 1913 **Beyond the Typewriter** Sharon Hartman Strom, 1992 By World War I managers wanted young women with some high school education for new light manufacturing jobs in the office Women could be paid significantly less than men with equivalent educations and the marriage bar the practice of not hiring or retaining married women ensured that most of them would leave the workplace before the issue of higher salaries arose Encouraged by free training gained in high schools and by working conditions better than those available in factories young working class women sought out office jobs Facing sexual discrimination in most of the professions and higher level office jobs middle class women often found themselves falling into clerical positions Sharon Hartman Strom details office working conditions and practices drawing upon archival and anecdotal data She analyzes women office workers ambitions and explores how the influences of scientific management personnel management and secondary vocational education affected office workplaces and hierarchies Strom illustrates how businessmen manipulated concepts of scientific management to maintain male dominance and professional status and to confine women to supportive positions She finds that women's responses to the reorganized workplace were varied although they were able to advance professionally in only limited ways they used their jobs as a means of pursuing friendships education and independence
