High Valley Of The:

Out of the Woods Stuart T. Hauser, Joseph Patrick Allen, Eve Golden, 2008-04-30 Seventy deeply troubled teenagers spend weeks months even years on a locked psychiatric ward They re not just failing in school not just using drugs They are out of control violent or suicidal in trouble with the law unpredictable and dangerous Their futures are at risk Twenty years later most of them still struggle But astonishingly a handful are thriving They re off drugs and on the right side of the law They ve finished school and hold jobs that matter to them They have close friends and are responsible loving parents What happened How did some kids stumble out of the woods while others remain lost Could their strikingly different futures have been predicted back during their teenage struggles The kids provide the answers in a series of interviews that began during their hospitalizations and ended years later Even in the early days the resilient kids had a grasp of how they contributed to their own troubles They tried to make sense of their experience and they groped toward an understanding of other people s inner lives In their own impatient voices *Out of the Woods* portrays edgy teenagers developing into thoughtful responsible adults Listening in on interviews through the years narratives that are often poignant sometimes dramatic frequently funny we hear the kids growing into more composed yet always recognizable versions of their tough and feisty selves **Ceramic**

The Lessening Stream Michael F.

Logan, 2006-09-01 Newcomers to Tucson know the Santa Cruz River as a dry bed that can become a rampaging flood after heavy rains Yet until the late nineteenth century the Santa Cruz was an active watercourse that served the region s agricultural needs until a burgeoning industrial society began to tap the river s underground flow *The Lessening Stream* reviews the changing human use of the Santa Cruz River and its aquifer from the earliest human presence in the valley to today Michael Logan examines the social cultural and political history of the Santa Cruz Valley while interpreting the implications of various cultures impacts on the river and speculating about the future of water in the region Logan traces river history through three eras archaic modern and postmodern to capture the human history of the river from early Native American farmers through Spanish missionaries to Anglo settlers He shows how humans first diverted its surface flow then learned to pump its aquifer and today fail to fully understand the river s place in the urban environment By telling the story of the meandering river from its origin in southern Arizona through Mexico and the Tucson Basin to its terminus in farmland near Phoenix Logan links developments throughout the river valley so that a more complete picture of the river s history

emerges He also contemplates the future of the Santa Cruz by confronting the serious problems posed by groundwater pumping in Tucson and addressing the effects of the Central Arizona Project on the river valley Skillfully interweaving history with hydrology geology archaeology and anthropology The Lessening Stream makes an important contribution to the environmental history of southern Arizona It reminds us that because water will always be the focus for human activity in the desert we desperately need a more complete understanding of its place in our lives *Report on the meteorology of India* India.
