**Higher Education: Handbook of Theory and Research** J.C. Smart, 1985-01-31 **Higher Education: Handbook of Theory and Research** J.C. Smart, 2012-12-06 To recapitulate Greeks differ from Independents and from the academy's value priorities but for the most part these differences derive from antecedent characteristics Moreover there are some grounds for speculating that these antecedent differences reflect fundamental temperamental differences extraversion and gregariousness mediated by social interaction as opposed to interaction through ideas Only to a limited degree does the Greek system appear to adversely affect the acquisition and assimilation of the academy's value priorities i.e. students as a whole Greek and Independent alike appear to become more independent liberal socially concerned and culturally sophisticated by graduation However the Greek system's effect on the behavior of Greeks is more troubling an effect largely mediated by the use and abuse of alcohol and the relative absence of direct institutional supervision Assuming the retention of the Greek system then the promotion of the academy's agenda appears dependent on a an understanding and accommodation of the personal characteristics of Greeks using appropriate pedagogical methods to advance the academy's educational objectives and both educational and administrative regulatory efforts to control the use and abuse of alcohol With or without the Greek system the advancement of the academy's agenda involves these considerations since the characteristics of students as a whole encompass the characteristics emphasized among Greeks

Outward and Upward Mobilities Ann H. Kim, Min-Jung Kwak, 2019-02-22 People move out to move up As in the case with other migrant groups the mobility experienced by international students is a form of social mobility and one that requires access from a host state But there are multiple institutions with which students interact and that influence the processes of social mobility Outward and Upward Mobilities investigates the connection between student and institution This edited collection features work by key scholars in the field and considers international students across Canada regardless of legal status Exploring how international students and their families fare in local ethnic communities educational and professional institutions and the labour market this volume demonstrates the need to ask more critical questions about the short and long term effects of temporary legal status how student and family experiences differ by education level and region of settlement the barriers to and facilitators of adaptation and integration and ultimately to what extent individual familial institutional and state goals function in harmony and in discord

**Global Issues in Higher Education** Pamela B. Richards, 2007 In most developed countries a high proportion of the population up to 50 percent now enter higher education at some time in their lives Higher education is therefore very important to national economies both as a significant industry in its own right and as a source of trained and educated personnel for the rest of the economy It follows that there are enormous stakes involved for a particular country even though the payoff of serious reforms may take decades and thus be counterproductive to the political forces responsible for designing and implementing such reforms since their horizons tend to be very short This new book tackles important issues in this dynamic field
