Haberman, 2021-05-04 How can religion help to understand and contend with the challenges of climate change Understanding Climate Change through Religious Lifeworld edited by David Haberman presents a unique collection of essays that detail how the effects of human related climate change are actively reshaping religious ideas and practices even as religious groups and communities endeavor to bring their traditions to bear on mounting climate challenges People of faith from the low lying islands of the South Pacific to the glacial regions of the Himalayas are influencing how their communities understand earthly problems and develop meaningful responses to them This collection focuses on a variety of different aspects of this critical interaction including the role of religion in ongoing debates about climate change religious sources of environmental knowledge and how this knowledge informs community responses to climate change and the ways that climate change is in turn driving religious change Understanding Climate Change through Religious Lifeworlds offers a transnational view of how religion reconciles the concepts of the global and the local and influences the challenges of climate change

**Fire in the Canyon** Leah Sarat, 2013-11-11 The canyon in central Mexico was ablaze with torches as hundreds of people filed in So palpable was their shared shock and grief they later said that neither pastor nor priest was needed The event was a memorial service for one of their own who had died during an attempted border passage Months later a survivor emerged from a coma to tell his story The accident had provoked a near death encounter with God that prompted his conversion to Pentecostalism Today over half of the local residents of El Alberto a town in central Mexico are Pentecostal Submitting themselves to the authority of a God for whom there are no borders these Pentecostals today both embrace migration as their right while also praying that their Mexican Dream the dream of a Mexican future with ample employment for all will one day become a reality Fire in the Canyon provides one of the first in depth looks at the dynamic relationship between religion migration and ethnicity across the U S Mexican border Faced with the choice between life threatening danger at the border and life sapping poverty in Mexico residents of El Alberto are drawing on both their religion and their indigenous heritage to demand not only the right to migrate but also the right to stay home If we wish to understand people's migration decisions Sarat argues we must take religion seriously It is through religion that people formulate their ideas about life death and the limits of government

Scriptures is the first book to present an eclectic cross cultural and comparative investigation of Bible use Moreover it models an important movement to outline a framework for how scriptures are implicated in organizing social structures and meanings with specific foci on gender ethnicity agency and power      Conversion of a Continent Timothy Steigenga,Edward L. Cleary,2009-11-27 A massive religious transformation has unfolded over the past forty years in Latin America and the Caribbean In a region where the Catholic Church could once claim a near monopoly of adherents religious pluralism has fundamentally altered the social and religious landscape Conversion of a Continent brings together twelve original essays that document and explore competing explanations for how and why conversion has occurred Contributors draw on various insights from social movement theory to religious studies to help outline its impact on national attitudes and activities gender relations identity politics and reverse waves of missions from Latin America aimed at the American immigrant community Unlike other studies on religious conversion this volume pays close attention to who converts under what circumstances the meaning of conversion to the individual and how the change affects converts beliefs and actions The thematic focus makes this volume important to students and scholars in both religious studies and Latin American studies      **Proclaiming Political Pluralism** Isaac Phiri,2001-09-30 As the population of Africa increasingly converts to Christianity the church has stepped up its involvement in secular affairs revolving around the transition to democracy in nations such as Zambia Zimbabwe and South Africa Comparative in approach the author analyzes patterns of church state relations in various sub Saharan countries and contends that churches become more active and politically prominent when elements and organizations of civil society are repressed by political factors or governing bodies providing services to maintain the well being of civil society in the absence of those organizations being repressed The author concludes that once political repression subsides churches tend to withdraw from a confrontation with the state and their political role becomes unclear This unique book advances the idea that in pluralist Africa churches should focus their influence and resources on nurturing the fragile multiparty democracies and promoting peace and reconciliation In his analysis of church state relations in sub Saharan Africa Phiri shows how churches are drawn into confrontation with the state by the repression of civil society and that once civil society is liberated direct church state confrontation diminishes In South Africa churches led by figures such as Bishop Desmond Tutu assumed a major role after nationalist movements such as Nelson Mandela s African National Congress were banned and their leaders jailed In Zimbabwe the church assumed a confrontational role in 1965 after political movements were banned and their leaders exiled In Zambia churches became confrontational when the single party rule repressed all opposition and supported the rise of the prodemocracy movement that ended Kenneth Kaunda s twenty seven year rule Examining these situations and others in different parts of Africa Phiri illuminates the major issues and conflicts and suggests ways in which the church can continue to help promote smooth transitions to democracy      *Global Christianity* Frans Jozef Servaas Wijsen,Robert J. Schreiter,2007 In 2002 Philip Jenkins wrote The Next Christendom Over the past half

century the centre of gravity of the Christian world has moved decisively to the global South says Jenkins Within a few decades European and Euro American Christians will have become a small fragment of world Christianity By that time Christianity in Europe and North America will to a large extent consist of Southern derived immigrant communities Southern churches will fulfil neither the Liberation Dream nor the Conservative Dream of the North but will seek their own solutions to their particular problems Jenkins book evoked strong reactions a bit to his own surprise as the book contained little new In the United States of America the prospect of a more biblical Christianity caused reactions of alarm in liberal circles In contrast conservatives were delighted by the same prospect In Europe the book landed in the middle of the debate on Europe as an exceptional case It was detested by those who stick to the theory of ongoing and irreversible secularisation and welcomed by those who see a resurgence of religion also in Europe In the present volume scholars of religion and theologians assess the global trends in World Christianity as described in Philip Jenkins book It is the outcome of an international conference on Southern Christianity and its relation to Christianity in the North held in the Conference Centre of Radboud University Nijmegen the Netherlands

Protestantism and State Formation in Postrevolutionary Oaxaca  
Kathleen M. McIntyre, 2019-05-15 In this fascinating book Kathleen M McIntyre traces intra village conflicts stemming from Protestant conversion in southern Mexico and successfully demonstrates that both Protestants and Catholics deployed cultural identity as self defense in clashes over local power and authority McIntyre s study approaches religious competition through an examination of disputes over tequio collective work projects and cargo civil religious hierarchy participation By framing her study between the Mexican Revolution of 1910 and the Zapatista uprising of 1994 she demonstrates the ways Protestant conversion fueled regional and national discussions over the state s conceptualization of indigenous citizenship and the parameters of local autonomy The book s timely scholarship is an important addition to the growing literature on transnational religious movements gender and indigenous identity in Latin America
