In-service teacher professional development and pre-service preparation to improve and enhance teacher quality; 2. a focus on mathematics literacy and core content area subjects; 3. assessment for learning; 4. high quality teaching and learning materials; and 5. positive school climates. We provide foundational guiding principles and recommendations for intervention design and implementation for each component. Additionally, we discuss and propose how to structure and design pre-service teacher preparation and in-service teacher training and ongoing support fortified by materials design and assessment to help teachers determine where learners are in developmental progressions, move learners towards mastery and differentiate and support learners who have fallen behind. We provide additional suggestions for integrating a whole school climate, curriculum, social emotional learning and school-related gender-based violence prevention strategies to address the internal and societal changes learners often face as they enter upper primary.
