## **Judge Harley And His Boys The Langdale Story:**

**Judge Harley and His Boys** John Lancaster, 2002      Won't Lose This Dream Andrew Gumbel, 2020-08-25 The extraordinary story of how Georgia State University tore up the rulebook for educating lower income students Georgia State has been reimagined amid a moral awakening and a raft of data driven experimentation as one of the South's more innovative engines of social mobility The New York Times Won't Lose This Dream is the inspiring story of a public university that has blazed an extraordinary trail for lower income and first generation students in downtown Atlanta the birthplace of the civil rights movement Over the past decade Georgia State University has upended the conventional wisdom that large numbers of students are doomed to fail simply because of their economic background or the color of their skin Instead it has harnessed the power of big data to identify and remove the obstacles that previously stopped them from graduating and completely transformed their prospects A student from a mediocre high school working two jobs to make ends meet is now no less likely to succeed than a child of wealth and privilege an earth shaking achievement that is reverberating across every college campus in the country With unique access to the key players and drawing on his skills as an investigative reporter Andrew Gumbel delivers a thrilling blow by blow account of a long battle to determine whether universities exist for their students or vice versa The story is told through the visionary leaders who overcame fierce resistance to tear up the rules of their own institution and through the many remarkable students whose resilience and determination often against daunting odds inspired the work at every stage Their success shows how the promise of social advancement through talent and hard work the essence of the American dream can be rekindled even in an age of deep inequalities and divisive politics      *Making Catfish Bait Out of Government Boys* Claire Strom, 2010 This first full length study of the cattle tick eradication program in the United States offers a new perspective on the fate of the yeomanry in the twentieth century South during a period when state and federal governments were both increasing and centralizing their authority As Claire Strom relates the power struggles that complicated efforts to wipe out the *Boophilus* tick she explains the motivations and concerns of each group involved including large and small scale cattle farmers scientists and officials at all levels of government In the remote rural South such as the piney woods of south Georgia and north Florida resistance to mandatory treatment of cattle was unusually strong and sometimes violent Cattle often ranged free and their owners raised them mostly for local use rather than faraway markets Cattle farmers in such areas shows Strom perceived a double threat in tick eradication mandates In addition to their added costs eradication schemes with their top down imposition of government expertise were anathema to the yeomanry's notions of liberty Strom contextualizes her southern focus within the national scale of the cattle industry discussing for instance the contentious place of cattle drives in American agricultural history Because Mexico was the primary source of potential tick reinfestation Strom examines the political and environmental history of the Rio Grande giving the book a transnational perspective Debates about the political and economic culture of small farmers have tended to focus on earlier

periods in American history Here Strom shows that pockets of yeoman culture survived into the twentieth century and that these communities had the power to block if only temporarily the expansion of the American state      **Forest History Today** ,2000      *The Florida Historical Quarterly* Florida Historical Society,1937      *The Southern Historian* ,2003      **Tapping the Pines** Robert B. Outland III,2004-12 The extraction of raw turpentine and tar from the southern longleaf pine along with the manufacture of derivative products such as spirits of turpentine and rosin constitutes what was once the largest industry in North Carolina and one of the most important in the South naval stores production In a pathbreaking study that seamlessly weaves together business environmental labor and social history Robert B Outland III offers the first complete account of this sizable though little understood sector of the southern economy Outland traces the South s naval stores industry from its colonial origins to the mid twentieth century when it was supplanted by the rising chemicals industry A horror for workers and a scourge to the Southeast s pine forests the methods and consequences of this expansive enterprise remained virtually unchanged for more than two centuries An important part of the timber products trade naval stores were originally used primarily in shipbuilding and maintenance Over the course of the nineteenth century these products came to be used in myriad ways including in the manufacture of paint thinner soap and a widely popular lamp oil and demand soared In response North Carolina producers enlarged their operations and expanded throughout the Southeast especially into Georgia and Florida but the short term economic development they initiated ultimately contributed to long term underdevelopment Outland vividly describes the primitive harvest and production methods that eventually destroyed the very trees the trade relied upon forcing operators to relocate every few years He introduces the many different people involved in the industry from the wealthy owner to the powerless worker and explores the reliance on forced labor slavery before the Civil War and afterwards debt peonage and convict leasing He demonstrates how the isolated forest environment created harsh working and living conditions making the life of a turpentine hand and his family exceedingly difficult With an exacting attention to detail and exhaustive research Outland offers not only the first definitive history of the naval stores industry but also a fresh interpretation of the socioeconomic development of the piney woods South **Tapping the Pines** is an essential volume for anyone interested in the region      *Forthcoming Books* Rose Arny,2004      [Congressional Record](#) United States.
