Micromodernism Tim Armstrong, 2025 What is wrong with literary modernism as a paradigm One answer is that it is over written a kind of winner s history with a relatively narrow canon of innovative works even including recent additions Another is that it is a retrospective construction rather than a term much used in its period This book seeks to return to the scene of literary renewal and to examine representative small groupings struggling in the wake of the High Modernism of the 1920s to articulate their own avant garde ambitions in terms of politics personal values aesthetic categories or continued allegiances to writers like Lawrence In looking at microhistories at literary beginnings and even at failure we are forced to reexamine our mapping of modernism

Jack Lindsay Anne Cranny-Francis, 2023-11-26 This book offers an in depth analysis of the work of prolific writer activist and publisher Jack Lindsay 1900 1990 It maps the development of his ideas across the twentieth century by reference to the five British writers about whom he published major studies William Blake John Bunyan Charles Dickens George Meredith and William Morris At the same time it maps the formation through the twentieth century of Left cultural politics which Lindsay repeatedly anticipated in areas such as the fundamental interconnectedness of human beings and the natural world the formative role of culture in both social and individual being the crucial role of the senses in embodied being and the rejection of mind body dualism Through his analysis Lindsay foretold both the social alienation and the environmental degradation that characterise the beginning of the twenty first century while his interdisciplinary research and transdisciplinary analysis provide models for how we might address these critical concerns
