**Landmark Cases in Competition Law** Barry Rodger, 2012-12-01 It is the thesis of this fascinating and highly instructive book on competition law that an examination of one landmark case scenario or saga each from a range of legal systems leads to a thorough understanding of the issues informing and arising from competition policy law and legal practice To that end leading scholars from 14 jurisdictions enhance their academic authority and rigour with an element of panache to describe a particularly salient case in each of their countries commenting in depth on the contribution of the case to the development of their particular competition law culture and to the case's enduring significance for competition law and its enforcement from a global perspective There are chapters for each of thirteen countries as well as the European Union preceded by an informative and thoughtful introduction For each landmark case selected the legislative background the case facts and the legal ruling and reasoning are all minutely described along with commentary critique and assessment of the case's impact and contemporary significance The cases cover vast swathes of the competition law territory in terms of substance and procedure dealing with cartels abuse of dominance mergers and vertical restraints and involving diverse forms of public and private enforcement processes Aspects covered include the following the public interest test bid rigging in public procurement the entitlement of dominant companies to compete on a level footing with other companies the hard to draw line between legitimate competition and unlawful monopolizing conduct the dangers of eclectic borrowing in the development and interpretation of competition law rules horizontal price fixing collusion hub and spoke cartels resale price maintenance agreements and the U.S. rule of reason the increasing use of private enforcement and the right for victims of a competition law infringement to seek compensation merger control in energy markets and the political use of merger review

rules to benefit domestic firms cooperation with criminal enforcement agencies and prosecutors the role courts play in undertaking adequate legal supervision of competition authorities leniency processes and obtaining access to confidential whistleblowing documentation imposition of administrative fines and other deterrence based sanctions and how the consumer welfare standard is interpreted More than a set of landmark case descriptions this book in which many chapters reflect upon recent and consider further future significant reforms demonstrates that competition law and its enforcement processes form part of a chronological narrative and that it is important to understand the broader legal social and economic context within which competition law and policy develop This wider perspective will prove immeasurably valuable to the many practitioners business people jurists and policy makers engaged in the shaping of competition law in any jurisdiction and will moreover be essential reading for postgraduate students studying any aspects of comparative competition law enforcement
