Friend & Foe Adam Galinsky, Maurice Schweitzer, 2015-09-29 What does it take to succeed? This question has fueled a long running debate. Some have argued that humans are fundamentally competitive and that pursuing self interest is the best way to get ahead. Others claim that humans are born to cooperate and that we are most successful when we collaborate with others. In **FRIEND AND FOE** researchers Galinsky and Schweitzer explain why this debate misses the mark. Rather than being hardwired to compete or cooperate, we have evolved to do both. In every relationship, from co-workers to friends to spouses to siblings, we are both friends and foes. It is only by learning how to strike the right balance between these two forces that we can improve our long term relationships and get more of what we want. Here Galinsky and Schweitzer draw on original cutting edge research from their own labs and from across the social sciences, as well as vivid real world examples to show how to maximize success in work and in life by deftly navigating the tension between cooperation and competition. They offer insights and advice ranging from how to gain power and keep it, how to build trust and repair trust once it's broken, how to diffuse workplace conflict and bias, how to find the right comparisons to motivate us and make us happier, and how to succeed in negotiations ensuring that we achieve our own goals and satisfy those of our counterparts. Along the way they pose and offer surprising answers to a number of perplexing puzzles: when does too much talent undermine success? why can acting less competently gain you status and authority? where do many gender differences in the workplace really come from? how can you use deception to build trust? and why do you want to go last on American Idol and in many interview situations but make the first offer when negotiating the sale of a new car? We perform at our very best when we hold cooperation and competition in the right balance. This book is a guide for navigating our social and professional worlds by learning when to cooperate as a friend and when to compete as a foe and how to be better at both.

China and Democracy Suisheng Zhao, 2014-06-11

China's dramatic economic growth in the last two decades of the last century and the prospect of its rise as a great power in this new one have greatly increased its weight and importance in world affairs. Consequently, the progress or lack of progress of China's transition to democracy has become a central concern of the international community. This timely collection brings together many well known scholars to systematically explore China's current government and assess that transition toward democracy. The contributors seek to bridge the gap between normative theories of democracy and empirical studies of China's political development by providing a comprehensive overview of China's domestic history, economy and public political ideologies. Overall, the volume contends that Chinese culture and Confucianism are not the obstacles to democratic transition.

that some scholars have said they are and that the success of market reforms has eroded authoritarian rule This weakening does not guarantee a successful transition however and the contributors show that there are many reasons to be skeptical about the short term prospects for democracy in China including historical failures the underdevelopment of civil society political apathy and competing social values Though China s political culture is essentially neither anti democratic nor pro democratic it must still overcome many obstacles in order to achieve democracy *Innovative Simulation Systems*

Killer Apps Jeremy Packer, Joshua Reeves, 2020-02-28 In *Killer Apps* Jeremy Packer and Joshua Reeves provide a detailed account of the rise of automation in warfare showing how media systems are central to building weapons systems with

artificial intelligence in order to more efficiently select and eliminate military targets Drawing on the insights of a wide range of political and media theorists Packer and Reeves develop a new theory for understanding how the intersection of media and military strategy drives today's AI arms race They address the use of media to search for enemies in their analyses of the history of automated radar systems the search for extraterrestrial life and the development of military climate science which treats the changing earth as an enemy As the authors demonstrate contemporary military strategy demands perfect communication in an evolving battlespace that is increasingly inhospitable to human frailties necessitating humans replacement by advanced robotics machine intelligence and media systems

Complexity Perspectives in Innovation and Social Change David Lane, Denise Pumain, Sander Ernst van der Leeuw, Geoffrey West, 2009-02-13 Innovation is nowadays a question of life and death for many

of the economies of the western world Yet due to our generally reductionist scientific paradigm invention and innovation are rarely studied scientifically Most work prefers to study its context and its consequences As a result we are as a society lacking the scientific tools to understand improve or otherwise impact on the processes of invention and innovation This book delves deeply into that topic taking the position that the complex systems approach with its emphasis on emergence is better suited than our traditional approach to the phenomenon In a collection of very coherent papers which are the result of an EU funded four year international research team s effort it addresses various aspect of the topic from different disciplinary angles One of the main emphases is the need in the social sciences to move away from neo darwinist population thinking to organization thinking if we want to understand social evolution Another main emphasis is on developing a generative approach to invention and innovation looking in detail at the contexts within which invention and innovation occur and how these contexts impact on the chances for success or failure Throughout the book is infused with interesting new insights but also presents several well elaborated case studies that connect the ideas with a substantive body of real world information
