Cane Toad Wars Rick Shine, 2018-03-20 In 1935 an Australian government agency imported 101 specimens of the Central and South American Cane Toad in an attempt to manage insects that were decimating sugar cane harvests. In Australia the Cane Toad adapted and evolved with abandon voraciously consuming native wildlife and killing predators with its lethal skin toxin. Today hundreds of millions of Cane Toads have spread across the northern part of Australia and continue to move westward. The humble Cane Toad has become a national villain. Cane Toad Wars chronicles the work of intrepid scientist Rick Shine who has been documenting the toad's ecological impact in Australia and seeking to buffer it. Despite predictions of devastation in the wake of advancing toad hordes, the author's research reveals a more complex and nuanced story. A firsthand account of a perplexing ecological problem and an important exploration of how we measure evolutionary change and ecological resilience, this book makes an effective case for the value of long-term natural history research in informing conservation practice.

Frogs and Toads Forever: The War at Sea, Iron Rails in the Garden State Anthony J. Bianculli, 2008 Fascinating stories of New Jersey's rich railroading history.

Tech Wars Daniel M. Gerstein, 2022-09-13 This book explores the evolution of the current U.S. research and development enterprise, asks whether this organization remains appropriate to the challenges we face today, and proposes strategies for better preparing for the global technology race shaping our future. Across the globe, nation-states and societies as well as corporations, technology developers, and even individuals find themselves on the front lines of a global technology race. In the third decade of this century, the outlines of the contest have become clear. R&D spending, new methods such as innovation centers, and powerful technologies in governments and society are rapidly proliferating. Technology winners and losers are emerging. How did we arrive at this global technology fight? How and where will it be waged? What can we do to prepare for the future? Tech Wars examines the conditions that have led us to this point and introduces new strategies, organizational changes, and resource allocations that will help the United States respond to the challenges on the horizon.

Transcultural Experiments E. Berry, M. Epstein, 1999-10-28 Contemporary processes of globalization have had a profound impact on cultural production and dissemination, both intra and cross-culturally. The dissemination of cultures on a global scale has led to multiple and complex effects among them: the formation of radical new modes of cultural interaction, transcultural flows, and hybridized knowledges, forms not easily understandable in terms of traditional models of discrete national or ethnic cultures, subcultures. Transcultural Experiments develops new scholarly and creative strategies out of this intersection of cultural traditions.

specifically in Russia and the United States Ellen E Berry and Mikhail N Epstein define and enact a transcultural method as an alternative to the legacies of cultural divisions and hegemony that have dominated both Western and Second Worlds The book introduces a system of original concepts and genres of writing that will help in mapping twenty first century global culture transculture vs multiculturalism interference vs difference potentiation vs deconstruction ethics of imagination and collective improvisation The authors make a revolutionary argument in cultural studies that will be of profound interest to anyone concerned with finding new modes of intercultural communication between the former First and Second Worlds
