From Ancient Cham To Modern Dialects:

From Ancient Cham to Modern Dialects Graham Thurgood, 1999-01-01 Based on a reconstruction of ancient Chamic with care taken to identify inherited Austronesian words as well as loan words and their sources this text points out what the linguistic evidence tells us about the history of the region and sketches the major consequences of historical contact on linguistic change in the history of Chamic **The Cham of Vietnam** Tran Ky Phuong, Bruce Lockhart, 2011-01-01 The Cham people once inhabited and ruled over a large stretch of what is now the central Vietnamese coast Written by specialists in history archaeology anthropology art history and linguistics these essays reassess the ways that the Cham have been studied

Lost Kingdoms: Hindu-Buddhist Sculpture of Early Southeast Asia Guy, John, 2014-04-07 A fresh and exciting exploration of Southeast Asian history from the 5th to 9th century seen through the lens of the region's sculpture *The Oxford Handbook of Language Contact* Anthony P. Grant, 2020-01-10 Every language has been influenced in some way by other languages In many cases this influence is reflected in words which have been absorbed from other languages as the names for newer items or ideas such as perestroika manga or intifada from Russian Japanese and Arabic respectively In other cases the influence of other languages goes deeper and includes the addition of new sounds grammatical forms and idioms to the pre-existing language For example English's structure has been shaped in such a way by the effects of Norse French Latin and Celtic though English is not alone in its openness to these influences Any features can potentially be transferred from one language to another if the sociolinguistic and structural circumstances allow for it Further new languages pidgins creoles and mixed languages can come into being as the result of language contact In thirty-three chapters *The Oxford Handbook of Language Contact* examines the various forms of contact induced linguistic change and the levels of language which have provided instances of these influences In addition it provides accounts of how language contact has affected some twenty languages spoken and signed from all parts of the world Chapters are written by experts and native speakers from years of research and fieldwork Ultimately this Handbook provides an authoritative account of the possibilities and products of contact induced linguistic change *Deconstructing Creole* Umberto Ansaldi, Stephen Matthews, Lisa Lim, 2007-06-22 *Deconstructing Creole* is a collection of studies aimed at critically assessing the idea of creole languages as a homogeneous structural type with shared and peculiar patterns of genesis Following up on the critical discussion of notions of creole exceptionalism as historical and ideological constructs this volume tests the basic assumptions that underlie current attempts to present creole structure as a special type from typological as well as sociohistorical perspectives The sum of the findings presented here suggests that careful empirical investigation of input varieties and contact environments can explain the structural output without recourse to an exceptional genesis scenario Echoing calls to dissolve the notion of creolization as a special diachronic process this volume proposes that theoretically grounded approaches to the notions of simplicity complexity transmission etc do not warrant considering so-called creole languages as a special synchronic type

Imagined Racial Laboratories , 2023-05-08 Imagined Racial Laboratories reveals the watermarks of science in the dynamics of racialisation in Southeast Asia during and after the colonial period Bringing together a set of critical histories of race sciences it illuminates the racialised dimensions of colony and nation in the region It demonstrates that racialisation took and continues to take mutable and multiple forms that often connect perhaps more than differentiate colonial and national periods across a variety of Southeast Asian settings Thus imagined races have contributed as much to the invention of modern Southeast Asia as have other fabled imagined communities

China's Lonely Revolution Jeremy A. Murray, 2017-03-27 Presents a new view of the Chinese revolution through the lens of the local Communist movement in

Hainan between 1926 and 1956 Jeremy A Murray's study of local Communist revolutionaries in Hainan between 1926 and 1956 provides a window into the diversity and complexity of the Chinese revolution Long at the margins of the Chinese state Hainan was once known by mainlanders only for its malarial climate and fierce indigenous people In spite of efforts by the Chinese Nationalists and the Japanese to exterminate Hainan's Communists the movement survived because of an alliance with the indigenous Li For years it persevered though in complete isolation from Communist headquarters on the mainland Using Chinese language sources archival materials and interviews Murray draws a vivid picture of this movement from the Hainanese perspective and broadens our understanding of how patriotism Party loyalty and Chinese identity have been experienced and interpreted in modern China *Typological Hierarchies in Synchrony and Diachrony* Sonia

Cristofaro, Fernando Zúñiga, 2018-07-15 Typological hierarchies are widely perceived as one of the most important results of research on language universals and linguistic diversity Explanations for typological hierarchies however are usually based on the synchronic properties of the patterns described by individual hierarchies not the actual diachronic processes that give rise to these patterns cross linguistically This book aims to explore in what ways the investigation of such processes can further our understanding of typological hierarchies To this end diachronic evidence about the origins of several phenomena described by typological hierarchies is discussed for several languages by a number of leading scholars in typology historical linguistics and language documentation This evidence suggests a rethinking of possible explanations for typological hierarchies as well as the very notion of typological universals in general For this reason the book will be of interest not only to the broad typological community but also historical linguists cognitive linguists and psycholinguists [The Blackwell](#)
