Mediation of International Conflicts Lesley G. Terris, 2016-12-08 This book examines the use of third party mediation as a conflict resolution method In an attempt to explain why some but not all conflicts are mediated this work argues that diverse conflict structures are inherently different in their susceptibility to mediation attempts By offering a systematic method for measuring the transformability of conflict structures this book contributes to our understanding of the sufficient and necessary conditions for mediation In addition the study offers an analytical framework for the examination of mediation as a trilateral rational bargaining process Although the general concept of mediation as a three person game is not new most studies focus on either the disputants perspectives or the mediator s perspective In contrast this study integrates the perspectives of all three parties The framework links the different stages involved in the whole process of mediation from the onset of mediation through the mediation strategies used to the outcome rather than focusing on one particular aspect The book applies the framework to two case studies the conflict between Israel and Egypt and the conflict between India and Pakistan and provides new insights into these conflicts from a mediation perspective In general the model developed here provides a framework for systematically assessing conflicts and the options available to those involved in the mediation process This book will be of much interest to students of conflict resolution mediation war and conflict studies Asian politics Middle Eastern politics and IR in general

Mehmet Deniz,2025-01-21 This book provides an in depth analysis of mediation arguing that it represents a vital tool for third party intervention and that back track mediation more specifically as one of the tools of such intervention is a pillar of mediation It further considers the Kurdish question of Turkey and the peace process initiatives between the Turkish state and the Kurdistan Workers Party PKK from the first in 1993 to the recently concluded Oslo Peace Talks in 2011 Rather than focusing on the historicity of the Kurdish issue this book devotes significant attention to analysing the five peace processes to date by investing the theory of mediation in each process with a view to testing whether each initiative fits the essence of mediation and back track mediation or not The book additionally considers two issues of secondary importance the reiteration of the emergence of the Kurdish question as a regional phenomenon responsible for derailing the Oslo Peace Talks between the parties as well as the intractability of conflicts and how they have potential to acquire violent intractable characters This monograph applies this theoretical knowledge to consider how Turkish and Kurdish conflicts have gradually morphed into an intractable singular conflict **Grassroots Mediation** David Hoicka, In a world torn by conflict from
