Nietzsche Trauma and Overcoming Uri Wernik,2018-01-15 Nietzsche Trauma and Overcoming shows that Nietzsche suffered from Post Traumatic Stress Disorder and most probably

was a victim of childhood sex abuse I bring convincing evidence from his texts to support these claims along with a discussion of corroborating psychological findings on these issues I show that he teaches coping with pain and suffering based on his life experience with lessons from the school of war the wisdom of reinterpretation and artistic activity His three themes of the Superman Eternal Recurrence and the Will to Power the heart of his philosophy and psychology are understood in a new light in relation to his personal suffering and overcoming The book criticizes the attempts to diagnose Nietzsche as suffering from various psychiatric disorders psychoanalyze him as a fatherless child grown old and outing him as a closet homosexual These approaches lead to a dead end Firstly it is impossible to prove that someone is a paragon of mental health not a covert homosexual and unmoved by a parent's death Secondly these speculations explain only a small part of Nietzsche's personal statements found in his writings Thirdly and most importantly they do not change our understanding of his ideas and how they were arrived at they do not increase our appreciation of him and do not leave us with any lessons for life the goal of any good writing according to Nietzsche
