From Here To Economy A Shortcut To Economic Literacy:

From Here to Economy Todd G. Buchholz, 1996-05-01 What is the GDP and what does it mean Why does the stock market go down when interest rates go up What causes a dreaded recession Economics impacts everyone's life but most people take on faith what they read in the newspaper Now for anyone who doesn't know much about economics noted economist Todd Buchholz explains it all simply and clearly With refreshing wit and irreverence Buchholz takes readers by the hand and reveals the basic rules behind everything from food prices to trade deficits Instead of complicated graphs and charts he uses examples from contemporary life and popular culture to demonstrate the principles at work By cutting through the arcane musings of academicians the jargon of analysts and advisors and the rhetoric of politicians he gives us a precise and accessible understanding of economic ideas actions and consequences as they actually exist in the here and now Here are some of the heretofore unintelligible ideas he helps us to understand what causes or combats inflation and why it is so feared what moves stocks and bonds up and down and how to invest wisely and safely whether it is good or bad to protect America from foreign goods and what happens when we do and when we don't what exactly Social Security is and whether government spending is good or bad and how dangerous the national debt is or isn't In today's confusing economic climate it has never been more important for everyone from homemakers to small business owners to individual investors and middle managers to understand the forces at work *Work in America* Carl E. Van Horn, Herbert A. Schaffner, 2003-12-15 The first comprehensive analysis of work and the workforce in the United States from the Industrial Revolution to the era of globalization This comprehensive two volume reference book is the first to analyze the central role of work and the workforce in U.S. life from the Industrial Revolution through today's information economy Drawing on a variety of disciplines economics public policy law human and civil rights cultural studies and organizational psychology its 256 entries examine key events concepts institutions and individuals in labor history Entries also tackle tough contemporary questions that reflect the conflicts inherent in capitalism What is the impact of work on families and communities On minority and immigrant populations How shall we respond to changing work roles and the growing influence of the transnational corporation *Work in America* describes and evaluates attempts to address social and class issues affirmative action occupational health and safety corporate management science and trade unionism and organized labor and offers the kind of comprehensive understanding needed to discover workable solutions *The Fullness of Time in a Flat World* Scott Waalkes, 2010-01-01 Best selling author Thomas Friedman says that globalization has made the world flat and that we cannot stop the process But while it is right to say that globalization tends to flatten our world it is wrong to say that there are no alternatives to current patterns of economic ecological political and cultural integration This book argues that the Christian liturgical calendar provides a constructive alternative to the globalization of economics ecologies politics and cultures It does so by incorporating the church into the fullness of time in the gospel narrative thereby helping us escape from the dead end of Friedman's flat world
