Mister Rogers and Philosophy Eric J. Mohr, Holly K. Mohr, 2019-10-15 Mister Rogers Neighborhood which began as The Children's Corner in 1953 and terminated in 2001 left its mark on America. The show's message of kindness, simplicity, and individual uniqueness made Rogers a beloved personality while also provoking some criticism because by arguing that everyone was special without having to do anything to earn it, the show supposedly created an entitled generation. In Mister Rogers and Philosophy, thirty philosophers give their very different takes on the Neighborhood phenomenon. Rogers's way of communicating with children has a Socratic dimension and is compared with other attempts to cultivate philosophy in children. Wonder is the origin of philosophy and science, and Mister Rogers always looked for wonder. Did Mister Rogers unwittingly create the Millennials by his message that everyone is special? What Martin Buber's I-Thou philosophy can tell us about Fred Rogers's attempt to rehabilitate children's television. X the Owl obsesses, Daniel Tiger regresses, Lady Elaine displaces anger, King Friday controls how puppets can be used to teach us about feelings. Fred Rogers's indirect communication is key to the show and most evident in the land of make-believe where he doesn't make himself known. How Mister Rogers helps us see that the ordinary world is extraordinary if we're willing to open ourselves up to it. How does Mister Rogers's method of teaching compare with Maria Montessori's? Fred Rogers and Carl Rogers have a lot in common. The Neighborhood is observed in the light of Rogerian therapy. Mister Rogers's view of evil is closer to Rousseau than to Voltaire. Fred Rogers gave a non-philosophical interpretation of the philosophical approach known as personalism. Daoism helps us understand how Fred Rogers, the antithesis of a stereotypical male, could achieve such success as a TV star. In the show and in his life, we can see how Rogers lived the ethics of care. Puppets help children understand that persons are not isolated but interconnected. Mister Rogers showed us that talking and singing about our feelings makes them more manageable.

Visions of Reality Greg Nyquist, 2009 In an age when political correctness, ideological myopia, political partisanship, and other sundry inanities have utterly mangled truth and clear insight, beyond all recognition, nothing can be more to the purpose than an open and honest examination of some of the more salient issues confronting the civilized world. In *Visions of Reality: Viewing Old Problems in a New Light*, philosopher and independent scholar Greg Nyquist takes a fresh look at some of the central issues confronting civilized man in the twenty-first century, eschewing the conventional platitudes that have enveloped them and instead opting to go wherever the evidence leads. Essays on conservatism, democracy, moral externalities, the psychopathology of the left, economics, business cycles, and intuition all bring a fresh perspective on some of the chief problems tormenting mankind. The book concludes with two ambitious essays on the meaning of life. The essay *Realism and the Spiritual Life* attempts to give an unbiased, agenda-free account of the evidence for and against theism. The book concludes with the essay *Freedom and the Spontaneous Universe*, which introduces a bold conjecture that rejects the determinism implicit in the cosmologies of neo-darwinists and creationists in favor of a vision of the universe that is

compatible with mankind's experience of individual initiative and freedom *The First Epoch* Luba Golburt, 2014-07-30 In the shadow of Pushkin's Golden Age Russia's eighteenth century culture was relegated to an obscurity hardly befitting its actually radical legacy Why did nineteenth century Russians put the eighteenth century so quickly behind them How does a meaningful present become a seemingly meaningless past Interpreting texts by Lomonosov Derzhavin Pushkin Viazemsky Turgenev Tolstoy and others Luba Golburt finds surprising answers Mathematics and Reality Mary Leng, 2010-04-22 Mary Leng offers a defense of mathematical fictionalism according to which we have no reason to believe that there are any mathematical objects Perhaps the most pressing challenge to mathematical fictionalism is the indispensability argument for the truth of our mathematical theories and therefore for the existence of the mathematical objects posited by those theories According to this argument if we have reason to believe anything we have reason to believe that the claims of our best empirical theories are at least approximately true But since claims whose truth would require the existence of mathematical objects are indispensable in formulating our best empirical theories it follows that we have good reason to believe in the mathematical objects posited by those mathematical theories used in empirical science and therefore to believe that the mathematical theories utilized in empirical science are true Previous responses to the indispensability argument have focussed on arguing that mathematical assumptions can be dispensed with in formulating our empirical theories Leng by contrast offers an account of the role of mathematics in empirical science according to which the successful use of mathematics in formulating our empirical theories need not rely on the truth of the mathematics utilized **From Truth to Reality** Heather Dyke, 2009-06-02 Questions about truth and questions about reality are intimately connected One can ask whether numbers exist by asking Are there numbers But one can also ask what arguably amounts to the same question by asking Is the sentence There are numbers true Such semantic ascent implies that reality can be investigated by investigating our true sentences This line of thought was dominant in twentieth century philosophy but is now beginning to be called into question In *From Truth to Reality* Heather Dyke brings together some of the foremost metaphysicians to examine approaches to truth reality and the connections between the two This collection features new and previously unpublished material by JC Beall Mark Colyvan Michael Devitt John Heil Frank Jackson Fred Kroon D H Mellor Luca Moretti Alan Musgrave Robert Nola JJ C Smart Paul Snowdon and Daniel Stoljar *Three Plays* Luigi Pirandello, 2014-04-10 SIX CHARACTERS IN SEARCH OF AN AUTHOR HENRY IV THE MOUNTAIN GIANTS Pirandello ranks with Strindberg Brecht and Beckett as a seminal figure in modern drama Innovative and influential he broke decisively with the conventions of realist theatre to foreground the tensions between art and reality In his best known play six characters imagined but then abandoned by their author intrude on the rehearsals of a provincial theatre company in an attempt to play out their family drama In the brilliant *Henry IV* a young man believes himself to be the Holy Roman Emperor attempts to cure him of his delusion have disastrous consequences *The Mountain Giants* is Pirandello's last unfinished masterpiece in which he moves towards the mythical and

make believe and real life once more become entangled The play reflects its author s growing anxiety about the function of art under a fascist regime This new edition includes Pirandello s important Preface to Six Characters an essential critical document for understanding the play that made him famous Anthony Mortimer s lively and performable translations remain scrupulously faithful to the letter and spirit of the originals Symbolic Play Inge Bretherton,2014-05-10 Symbolic Play The Development of Social Understanding describes the development of symbolic play from infancy through the preschool years This text is divided into 12 chapters that focus on make believe as an activity within which young children spontaneously represent and practice their understanding of the social world The first chapter introduces the development of event schemata produced in symbolic play about children s management of the playframe and about the development of subjunctive or what if thought The next chapters are devoted to the development of joint pretending specifically the use if shared scripts in the organization of make believe play and the subtleties of metacommunication These chapters also emphasize the supporting role of the mother in early collaborative make believe These topics are followed by discussions of the child s growing ability to represent the internal states of the inanimate figures whose doing can vicariously enacts The remaining chapters focus on social interaction through symbolic play with dolls toy animals object props and language This book will prove useful to psychologists and researchers in the fields of human development society and family Christ and the End of Meaning Paul Hessert,1993 Both liberal and conservative churches offer the world meaningful Christianity Hessert argues that meaning itself is the problem that Christ and His teachings sought to solve The Gospel is not about meaning but an alternative to the very structure and stricture of meaning He proposes living with patience and passion through joys and suffering for passion is the life of the soul **Make/Believing the World(s)** Mark S. McLeod-Harrison,2009-11-10 A vigorous defence of a radical ontological pluralism that requires theism and is consistent with traditional Christianity

Augmented Reality José María Ariso,2017-04-10 There is at present no publication specifically dedicated to analyzing the philosophical implications of augmented reality especially regarding knowledge formation which constitutes a fundamental trait of knowledge society That is why this volume includes an analysis of the applications and implications of augmented reality While applications cover diverse fields like psychopathology and education implications concern issues as diverse as negative knowledge group cognition the internet of things and ontological issues among others In this way it is intended not only to generate answers but also to draw attention to new problems that arise with the diffusion of augmented reality In order to contemplate these problems from diverse perspectives the authors are from a variety of fields philosophy computer sciencess education psychology and many more Accordingly the volume offers varied and interesting contributions which are of interest to professionals from multiple disciplines *Shared Reality* E. Tory Higgins,2019-06-04 What does it mean to be human Why do we feel and behave in the ways that we do The classic answer is that we have a special kind of intelligence But to understand what we are as humans we also need to know what we are like motivationally And what is

central to this story what is special about human motivation is that humans want to share with others their inner experiences about the world share how they feel what they believe and what they want to happen in the future They want to create a shared reality with others People have a shared reality together when they experience having in common a feeling about something a belief about something or a concern about something They feel connected to another person or group by knowing that this person or group sees the world the same way that they do they share what is real about the world In this work Dr Higgins describes how our human motivation for shared reality evolved in our species and how it develops in our children as shared feelings shared practices and shared goals and roles Shared reality is crucial to what we believe sharing is believing It is central to our sense of self what we strive for and how we strive It is basic to how we get along with others It brings us together in fellowship and companionship but it also tears us apart by creating in group bubbles that conflict with one another Our shared realities are the best of us and the worst of us God in the Act of Reference Erica

Appelros,2017-03-02 To claim to believe in God without accepting that God exists independently of human minds would mean reducing God to merely a human construct thus not real enough for being the object of religious worship This book sets out to challenge this common view on existence and religious belief Arguing from concrete examples of language use in children s make believe play and other ordinary situations Erica Appelros suggests that what makes us consider something to be real involves our capacities to relate to our surroundings not only on grounds of their physical characteristics but also on grounds of human construction This book makes a substantial contribution to the contemporary debate within philosophy of religion on religious realism and non realism and suggests innovative and constructive solutions to the perennial philosophical and religious issue of what is meant by talking about God and God s existence **The Sunset of Science and the Risen Son of Truth**

Calvin W. Allison,2017-08-04 In a unique work of literature author Calvin W Allison presents The Sunset of Science and the Risen Son of Truth The book contains a very stylistic compilation of important topics presented in various forms of writing including diverse styles of poetry illustrations scenarios analogies articles a deeply insightful novella and a revision of his personal biography While the Gospel is the centerpiece in this thought provoking project the subject matter also branches out to touch on science politics environmental issues and a smidgen of other topics that will align together in a compatible fashion Calvin wants to open up the readers understanding on a variety of issues while simultaneously expanding their thought process so that they will be able to distinguish between truth and fiction in a time when distortions are regularly passed through the airwaves of the media outlets The novella included in this work is titled Mental Dexterity It is a highly informative tale of a talk show host named Cal who in a time when distortions are frequently broadcast to the general public as reliable news has a keen sense of detecting truth by making connections in details that arent meant to be connected While some are critical of Cals ability referring to it as forming perception puzzles others are threatened by what he is able to perceive and soon he finds himself in deep societal waters So brace yourself for the momentum Because youre about to be

engulfed in a mental sphere of intrigue while being intellectually saturated in a stimulating shower of well prepped penmanship articulated to communicate important information that will work to strengthen your understanding on life affecting issues

The Poetic of Reason: Introducing Rational Poetic Experimentalism Stefán Snævarr, 2022-09-26 This book makes the attempt to wed reason and the poetic The tool for this attempt is Rational Poetic Experimentalism RPE which is introduced and explored in this book According to RPE it makes sense to look for poetic elements in human reality including reason outside of the realm of imaginative literature Provocatively RPE contends that philosophy s search for truth has not been a great success so far So why not experiment with philosophical concepts and look for thought provoking ideas by employing the principles of RPE instead of fruitlessly searching for truths using conventional methods

On Translating Signs Dinda L. Gorfée, 2004 Translation produces meaningful versions of textual information But what is a text What is translation What is meaning And what is a translational version This book On Translating Signs Exploring Text and Semio Translation responds to those and other eternal translation theoretical questions from a semiotic point of view Dinda L Gorfée notes that in this world of interpretation and translation surrounded by our semio translational universe perfused with signs we can intuit

whether or not an object in front of us disqualifies as a text This spontaneous understanding requires no formalized definition in order to happen in the receivers of text signs The author further observes that translated signs are not only intelligible for target audiences but also work together as a theatre of consciousness or a theatre of controversy which the author views as powered by Charles S Peirce's three categories of Firstness Secondness and Thirdness This book presents the virtual community of translators as emotional dynamical intellectual but not infallible semioticians They translate text signs from one language and culture into another thus creating an innovative sign milieu packed with intuitive dynamic and changeable signs Translators produce fleeting and fallible text translations with obvious errors caused by ignorance or misguided knowledge Text signs are translatable yet there is no such thing as a perfect or final translation And without the ongoing creating of translated signs of all kinds there would be no novelty no vagueness no manipulation of texts and for that matter no semiosis

The Truth About Reality Anti Christ, 2008-08-15 This book is for you Anti Christ introduces you to yourself your government and to your god People from all walks of life and religion wonder about the validity of religion Are physical creatures eternal beings cast in a prison of flesh or did life accidentally spring forth from the absurd and incoherent twists and turns of evolution The several kinds of reality this book introduces fill the voids of understanding about reality with real knowledge The book is not about religion spirituality occult or anything concretely physical It encompasses all the deceitful control schemes laid on you like obedient dogs in their traces You cannot afford to stay ignorant for your continued existence depends on knowing what and who you are physically and spiritually The mysteries of life are caused by your belief systems To believe means that you do not know Belief is the portal to hell the permanent state of living death knowledge is the portal to reality and eternal life Science and religion cannot give the insight this book brings Whether you believe the material is for you or not you cannot afford to remain ignorant for the route back to true reality is made clear Ignorance always portrays itself as brilliance The world is full of brilliant pretenders My brother Anti Christ leads you from example to example to understand the hoax on which physical reality is based The more real life seems the more you are betrayed and trapped The greatest mystery in the mind is the mystery of yourself Vaguely you all believe to be strangers guilty of something not understood Anti Christ gives you the better outlook on life than any ideology ism or cult you now subscribe to Through believing clever deceits mankind never saw physical awareness for what it is What humanity endlessly searches for lies revealed in the pages of this book It overrules all human and so called godly knowledge I could not have said it better Make it yours Jesus Christ
