From Classical Economics To Development Economics:

From Classical Economics to Development Economics G. Meier, 1994-05-15 Most development economists are versed only in the post World War II period of their subject But economic growth was a major concern in the 18th century and colonial economics and policy commanded much attention in the 19th and first half of the 20th centuries A return to these earlier concerns can now provide present day development economists with a greater appreciation of the intellectual history of their subject Even more such a return might strengthen the conceptual and empirical foundations of the subject These are this book's objectives

Inframarginal Analysis vs Marginal Analysis is presented as a consistent theoretical framework throughout Shows how the relationship of Inframarginal Analysis to Marginal Analysis has influenced the shift back to an interest in Classical Economics from Neoclassical Economics with regard to economic development Allows economists to reduce their overall reliance on marginal analysis which may be less relevant to development economics than it is to the economics of development countries Brings considerable analytic machinery to bear on important problems A focus on institutions and transaction costs that is very relevant to development economics Offers a thorough analysis of trade CHs 3 7 and macroeconomics CHs 16 19 both of which are not dealt with in depth by comparable textbooks
