Bordering the Baltic Madeleine Hurd,2010 In this book scholars from different disciplines use case studies drawn from Sweden Norway Finland and Denmark to analyze the last century's construction of engagement with and challenges to both hard and soft Scandinavian boundaries The book provides historical examples of how national borders have been contested by Scandinavian states caught between powerful Continental neighbors these attempts to firm up boundaries can be contrasted to the denationalization of borders caused both by the globalization of communications and markets and by political efforts to submerge national boundaries in a common Baltic identity A second set of studies focuses on boundaries defining Scandinavian minorities Here the book analyzes the spaces rituals bodies gender roles and collective identity discourses implicit in majority minority boundaries and their transgression Throughout Scandinavian bordering processes are studied in terms of the groups that launch them the methods by which they are propagated and finally the meanings supposedly and actually invested in them

Series Nordische Geschichte Vol 10 **Decisional Privacy and the Rights of the Child** Georgina Dimopoulos, 2022-10-14
 Decisional privacy gives individuals the freedom to act and make decisions about how they live their lives without unjustifiable interference from other individuals or the state This book advances a theory of a child's right to decisional privacy It draws on the framework of the United Nations Convention on the Rights of the Child and extends the work of respected children's rights scholars to address a significant gap in understanding the interconnections between privacy family law and children's rights It contextualises the theory through a case study judicial proceedings concerning medical treatment for children experiencing gender dysphoria This work argues that recognising a substantive right to decisional privacy for children requires procedural rights that facilitate children's meaningful participation in decision making about their best interests It also argues that as courts have increasingly encroached upon decision making regarding children's medical treatment they have denied the decisional privacy rights of transgender and gender diverse children This book will benefit researchers students judicial officers and practitioners in various jurisdictions worldwide grappling with the tensions between children's rights parental responsibilities and state duties in relation to children's best interests and with the challenge of better enabling and listening to children's voices in decision making processes The Law as a Moral Agent Charles Foster, Jonathan Herring, 2021-03-30 This book examines the controversial and repercussive contention that an objective of the law should be to promote personal morality to make people ethically better It surveys a number of domains including criminal law tort law contract law family law and medical law particularly the realm of moral enhancement technologies asking for each a Does the existing law seek to promote personal morality b If so what is the account of morality promoted and what is the substantive content c Does it work and d Is this a legitimate objective *After Legal Equality* Robert Leckey, 2014-07-11 Groups seeking legal equality often take a victory as the end of the line Once judgment is granted or a law is passed coalitions disband and life goes on in a new state of equality Policy makers too may assume that a troublesome file is now closed This collection arises from the urgent sense that law reforms driven by equality call for fresh lines of inquiry In unintended ways reforms may harm their intended beneficiaries They may also worsen the disadvantage of other groups Committed to tackling these important issues beyond the boundaries that often confine legal scholarship this book pursues an interdisciplinary consideration of efforts to advance equality as it explores the developments challenges and consequences that arise from law reforms aiming to deliver equality in the areas of sexuality kinship and family relations With an international array of contributors *After Legal Equality Family Sex Kinship* will be an invaluable resource for those with interests in this area *Closing the Door to Destitution* Raymond Richards, 2010-11-01 *Law in Society: Reflections on Children, Family, Culture and Philosophy* Alison Diduck, Noam Peleg, Helen Reece, 2015-08-24 This collection written by legal scholars from around the world offers insights into a variety of topics from children's rights to criminal law jurisprudence medical ethics and more Its breadth reflects the fact that these are all elements of what can broadly be called

law and society that enterprise that is interested in law's place or influence in different aspects of real lives and understands law to be simultaneously symbol philosophy and action It is also testament to the broad range of vision of Professor Michael Freeman in whose honour the volume was conceived The contributions are divided into categories which reflect his distinguished career and publications over 85 books and countless articles including pioneering work on children's rights domestic violence religious law jurisprudence law and culture family law and medicine ethics and the law as well as his enduring commitment to interdisciplinarity The volume begins with work on law in its philosophical cultural or symbolic realm Part I Law and Stories Culture Religion and Philosophy including its commitment to the normative ideal of rights Part II Law and Rights and then offers work on law as coercive state action Part III Law and the Coercive State and as regulator of personal relationships Part IV Law and Personal Living It continues with reflections on the importance of globalisation both of law and of doing family in personal and public life Part V Law and International Living before closing with two reflections on Michael Freeman's body of work generally including one from Michael himself Part VI Law and Michael Freeman

Children, Autonomy and the Courts Aoife Daly, 2017-12-18 In this book Aoife Daly argues that where courts decide children's best interests for example about parental contact the UN Convention on the Rights of the Child's right to be heard is insufficient and autonomy should instead be the focus Global law and practice indicate that children are regularly denied due process rights in their own best interest proceedings and find their wishes easily overridden It is argued that a children's autonomy principle respecting children's wishes unless significant harm would likely result would ensure greater support for children in proceedings and greater obligations on adults to engage in transparent decision making This book is a call for a reconceptualisation of the status of children in a key area of children's rights

Law and Ethics in Children's Nursing Judith Hendrick, 2011-06-09 Law and Ethics in Children's Nursing is an important and practical guide on the legal and ethical aspects of child healthcare that enables nurses to understand the legal and ethical principles that underpin everyday nursing practice It explores the concept of childhood and children's rights the extent to which their rights are upheld in a variety of settings and the relationship between law and ethics and how they interact in resolving problems and dilemmas that commonly arise in practice With case studies learning outcomes and scenarios throughout Law and Ethics in Children's Nursing places the care and treatment of children in a legal and ethical framework and explores the way in which legal and ethical aspects of children's nursing differ from those of adults It explores general principles such as autonomy and consent confidentiality accountability and negligence It then goes on to look at specialist areas such as abortion sterilisation research mental health organ donation child protection and death

Medical Treatment of Children and the Law Jo Bridgeman, 2020-11-19 The high profile cases of Charlie Gard Alfie Evans and Tafida Raqeeb raised the questions as to why the state intrudes into the exercise of parental responsibility concerning the medical treatment of children and why parents may not be permitted to decide what is in the best interests of their child This book answers these questions It argues for a

reframing of the law concerned with the medical treatment of children to one which better protects the welfare of the individual child within the context of family relationships recognising the duties which professionals have to care for the child and that the welfare of children is a matter of public interest protected through the intervention of the state This book undertakes a rigorous critical analysis of the case law concerned with the provision of medical treatment to children since the first reported cases over forty years ago It argues that understanding of the cases only as disputes over the best interests of the child and judicial resolution thereof fails to recognise professional duties and public responsibilities for the welfare and protection of children that exist alongside parental responsibilities and which justify public or state intervention into family life and parental decision making Whilst the principles and approach of the court established in the early cases endure the nature and balance of these responsibilities to children in their care need to be understood in the changing social legal and political context in which they are exercised and enforced by the court The book will be a valuable resource for academics students and practitioners of Medical Law Healthcare Law Family Law Social Work Medicine Nursing and Bioethics

Motherhood and the Law Harry Willekens, Kirsten Scheiwe, Theresa Richarz, Eva Schumann, 2019 Who is a child's legal mother Must a child have exactly one mother can it have two or three or can it have two fathers but no mother Or has the concept of motherhood become obsolete and should we just talk of parenthood in a gender neutral way Questions such as these would have appeared esoteric only a few decades ago but as a result of new social developments such as frequent family reconstitutions gay and lesbian emancipation or surrogacy and of technological innovations such as egg and embryo donations they have become issues in a vehement debate The interdisciplinary contributions to this book focus on the legal definition of motherhood on the way in which legal conceptions structure the social discourse on motherhood and vice versa and on the influence of legal rules on power relations between mothers fathers children and the state Among the issues addressed are the challenges to our understanding of the legal regulation of motherhood by developments in reproductive medicine the challenges to our understanding of the legal regulation of motherhood by parental constellations deviating from the mother father model single motherhood by choice same gender parenthood multiple parenthood the exercise of parental rights in case of parental separation and the impact of legal rules on the bargaining positions of mothers and fathers

Herdbook Containing the Pedigree of Improved Short-horn Cattle, 1891 Vols include the Shorthorn Society's Grading register for beef Shorthorn cattle v include the society's Herd book of poll shorthorns **Rights, Gender and Family Law** Julie Wallbank, Shazia Choudhry, Jonathan Herring, 2009-12-04 There has been a widespread resurgence of rights talk in social and legal discourses pertaining to the regulation of family life as well as an increase in the use of rights in family law cases in the UK the US Canada and Australia Rights Gender and Family Law addresses the implications of these developments and in particular the impact of rights based approaches upon the idea of welfare and its practical application There are now many areas of family law in which rights and welfare based approaches have been forced together But whilst

to many they are premised upon different ethics respectively of justice and of care for others they can nevertheless be reconciled In this respect a central concern is the gender blind character of rights based approaches and the ontological and practical consequences of their employment in the gendered context of the family Rights Gender and Family Law explores the tensions between rights based and welfare based approaches explaining their differences and connections considering whether if at all they are reconcilable and addressing the extent to which they can advantage or disadvantage the interests of women children and men It may be that rights based discourses will dominate family law at least in the way that social policy and legislation respond to calls of equality of rights between mothers and fathers This collection however argues that rights cannot be given centre stage without thinking through the ramifications for gendered power relations and the welfare of children It will be of interest to researchers and scholars working in the fields of family law gender studies and social welfare
