Lyons,1995 Professor Lyons in this book both explores others approaches to intentionality and expounds his own Part I gives
a critical account of the five most comprehensive and prominent contemporary approaches to intentionality These
approaches can be summarised as the instrumentalist approach derived from Carnap and Quine and culminating in the work
of Daniel Dennett the linguistic approach derived from the work of Chomsky and exhibited most fully in the work of Jerry
Fodor the biological approach developed by Ruth Garrett Millikan Colin McGinn and others the information processing
approach which has been given a definitive form in the work of Fred Dretske and the functional role approach of Brian Loar
In Part II Professor Lyons sets out a multi level developmental approach to intentionality Drawing upon work in
neurophysiology and psychology the author argues that intentionality is to be found in different forms at the levels of brain
functioning prelinguistic consciousness language and at the holistic level of whole person performance which is demarcated
by our ordinary everyday talk about beliefs desires hopes intentions and the other propositional attitudes Written in a direct
clear and lively style the extended survey of contemporary debate in Part I will be invaluable to the student of philosophy of
mind or cognitive science as well as to the scholars and graduate students who will find an original new theory to contend
