practice of mechanism and machine science which are instrumental in reaching a sustainable development such as biomechanical engineering sustainable energy systems robotics and mechatronics green tribology computational kinematics dynamics of machinery industrial applications of mechanism design gearing and transmissions multibody dynamics rotor dynamics vibrations humanitarian engineering and socio technical systems for sustainable and inclusive development The contributions which were selected by means of a rigorous international peer review process highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists demonstrating that medical and service robotics will drive the technological and societal change in the coming decades

The National Union Catalog, Pre-1956 Imprints ,1968 *Capitalism in Chaos* Máté Rigó,2022-08-15 *Capitalism in Chaos* explores an often overlooked consequence and paradox of the First World War the prosperity of business elites and bankers in service of the war effort during the destruction of capital and wealth by belligerent armies This study of business life amid war and massive geopolitical changes follows industrialists and policymakers in Central Europe as the region became crucially important for German and subsequently French plans of economic and geopolitical expansion in the late nineteenth and early twentieth centuries Based on extensive research in sixteen archives five languages and four states M t Rigó demonstrates that wartime destruction and the birth of war millionaires were two sides of the same coin Despite the recent centenaries of the Great War and the Versailles peace treaties knowledge of the overall impact of war and border changes on business life remains sporadic based on scant statistics and misleading national foci Consequently most histories remain wedded to the viewpoint of national governments and commercial connections across national borders *Capitalism in Chaos* changes the static historical perspective by presenting Europe's East as the economic engine of the continent Rigó accomplishes this paradigm shift by focusing on both supranational regions including East Central and Western Europe as well as the eastern and western peripheries of Central Europe Alsace Lorraine and Transylvania from the 1870s until the 1920s As a result *Capitalism in Chaos* offers a concrete lively history of economics during major world crises with a contemporary consciousness toward inequality and disparity during a time of collapse **From Toleration to Expulsion**

Henry A. Fischer,2015-01-30 On April 6 1948 a significant portion of the population of the village of Ecsny in Somogy County Hungary was expelled from their homeland This was the result of Protocol XIII of the Potsdam Declaration of 1945 calling for the orderly and humane transfer of German populations now living in Poland Czechoslovakia and Hungary The families involved were descendants of German settlers who began to arrive in what would become the village of Ecsny as early as 1754 They formed an Evangelical Lutheran congregation at the outset that would survive as an underground movement until the Edict of Toleration promulgated by the Emperor Joseph II of Austria in 1782 These two governmental actions taken centuries apart play pivotal roles in the lives and destinies of the families who would call Ecsny their home The families that were expelled were sent to the then Russian Zone of Germany from which large numbers later escaped into the American

and British Zones Numerous families were successful in emigrating from there to Canada the United States and Australia This publication is addressed to their English speaking descendants providing them with genealogical information about their forebears In addition the families associated with the various affiliated congregations in Hcs Polny Rksi Somodor and Vmos are included as well as information about the families that emigrated to Slavonia the United States and Canada prior to World War II There are also introductory articles to assist the reader in having a basic knowledge of the history lifestyle and origins of their families This work is published on the 260th anniversary of the founding of Ecsny Russian Cultural Penetration in Hungary István Csicsery-Rónay,Mátyás Rákosi,Róbert Gábor,Yugoslavia,1951 Szab. Kir. Pestvárosában lévő házak-jegyzéke. ... Häuser-Schema der Kön. Freistadt Pest, etc ,1863 **The Holy Crown and the Hungarian**

Estates Kees Teszelszky,2023-04-17 This book is about one of the most important elements of the political narratives in the history of Hungary in past and present the Holy Crown of Hungary This object is one of the most widely used symbols of modern Hungarian nationalism in our times and has been in use for ages in political culture Surprisingly less is known how the meaning of the crown has changed over the centuries and how this influenced the development of national identity in the early modern period Starting point is that the medieval doctrine of the holy crown is a modern invention Teszelszky s research concentrates on the relation between the change in the meaning of this crown and the construction of an early modern national identity between 1572 and 1665 Using a constructivist method of research the author shows how the Habsburg ruler and the Hungarian estates legitimised their political program through an image of the crown and the Hungarian political community In a short period between the end of 1604 and 1613 during a rebellion in Hungary a war with the Ottomans and a strife between Emperor Rudolf II and his brother Archduke Matthias the medieval tradition of the holy crown was revived and redeveloped by Hungarian and foreign historiographers into an ideology which is still present today

The Communist Ideology in Hungary E. Laszlo,2012-12-06 The immediate purpose of this handbook is to aid further research by stating in a form providing handy reference the facts concerning the Communist ideology in Hungary Following a narrative of the vicissitudes of that ideology prior to its power phase intended as a general introduction contributing to the proper assessment of the 1945 1965 period which is the main concern of this book the essential and relevant facts concerning the events issues organizations and opinions which have shaped post war Hungarian Marxism Leninism are set out without indulging in lengthy commentaries and personal value judgements Since even the 1956 revolution is treated thus perhaps the most important and certainly the most controversial single event of the above period I should add that the reader interested in finding a detailed analysis and evaluation of the ideological relevance of that event may refer to my Individualism Collectivism and Political Power The Hague 1963 pp 111 140 Despite the specificity of much of the data sufficient translations of Hungarian titles names and terms have been provided to render the present book useful for the investigator regardless of whether or not he reads Hungarian But the fundamental purpose of this volume is to make a

modest contribution to East West understanding It has arisen from the belief that the lessening of world tensions is best served by understanding and understanding is best served by objective information **Mednyánszky** László
