**Americanness** Simon J. Bronner, 2021-08-11 *Americanness* *Inquiries into the Thought and Culture of the United States* analyzes several core themes that connect Americans because of and despite their pronounced diversity The book investigates shared ideas and ideals such as individualism mobility materialism and future orientation that drive an overarching American worldview Simon J Bronner begins with ideas of space and time as they formed and changed through the history of the United States before moving to the emergence of modern American culture He examines reasons America is characterized as having a victory culture that extends to the American legal military and business complexes This victory culture is further analyzed by looking at the country's relationship with the game of football a sport that thrives in America but has not caught on in other countries Finally the volume probes American consumerism driven by a desire for individual prosperity in a supposedly egalitarian society Using interdisciplinary approaches drawn from psychology sociology ethnology and history Bronner seeks explanations for people invoking and evoking ideas that they perceive as American This book would be an invaluable addition to courses on American history sociology cultural studies and American studies *Fast Families, Virtual Children* Ben Agger, Beth Anne Shelton, 2016-01-20 The Internet cell phones and other technologies have changed the ways in which people conduct their family lives raise children and navigate the blurry boundary between work

**Crisis and Critique** Anne Kaun, 2016-09-15 Throughout history innovations in media have had a profound impact on protest and dissent But while these recent developments in social media have been the subject of intense scholarly attention there has been little consideration of the wider historical role of media technologies in protest Drawing on the work of key theorists such as Walter Benjamin and Raymond Williams *Crisis and Critique* provides a historical analysis of media practices within the context of major economic crises Through richly detailed case studies of the movements which emerged during three different economic crises the unemployed workers movement of the Great Depression the rent strike movement of the early 1970s and the Occupy Wall Street protests which followed the recession of 2007 Kaun provides an in depth analysis of the cultural economic and social consequences of media technologies and their role in shaping and facilitating resistance to capitalism

*Hermes on Two Wheels* Kevin Wehr, 2009-09-28 *Hermes on Two Wheels* shows the dynamic world of the bicycle messenger through a sociological lens based on a five year participant observation study Beginning with the experiences of messengers themselves and moving to describe the structural settings of those experiences the research shows how messengers work within a political economic system that devalues semi skilled labor and strips people of emotional fulfillment The voluntary risk taking of messengers becomes a means of achieving such emotional fulfillment as well as making a living while their stylistic expressions pay dividends in cultural scrip rather than money Through their work messengers help to reproduce and maintain the structures of society while also constructing a vibrant rebellious politicized subculture that has come to represent the new urban hipster an image continually under threat of co optation

**Disability, Space, Architecture: A Reader** Jos Boys, 2017-02-17 *Disability Space Architecture A Reader* takes a groundbreaking approach to exploring the interconnections between disability architecture and cities The contributions come from architecture geography anthropology health studies English language and literature rhetoric and composition art history disability studies and disability arts and cover personal theoretical and innovative ideas and work Richer approaches to disability beyond regulation and design guidance remain fragmented and difficult to find for architectural and built environment students educators and professionals By bringing together in one place some seminal texts and projects as well as newly commissioned writings readers can engage with disability in unexpected and exciting ways that can vibrantly inform their understandings of architecture and urban design Most crucially *Disability Space Architecture A Reader* opens up not just disability but also ability dis ability as a means of refusing the normalisation of only particular kinds of bodies in the design of built space It reveals how our everyday social attitudes and practices about people objects and spaces can be better understood through the lens of disability and it suggests how thinking differently about dis ability can enable innovative and new kinds of critical and creative architectural and urban design education and practice

**Consumer Engineering, 1920s-1970s** Jan Logemann, Gary Cross, Ingo Köhler, 2019-05-29 In the middle of the twentieth century a new class of marketing expert emerged beyond the familiar ad men of Madison Avenue Working as commercial designers consumer psychologists sales managers and market researchers these professionals were self defined consumer engineers and their rise heralded a new era of marketing To what extent did these efforts to engineer consumers shape consumption practices And to what extent was the phenomenon itself a product of broader social and cultural forces This collection considers consumer engineering in the context of the longer history of transatlantic marketing Contributors offer case studies on the roles of individual consumer engineers on both sides of the Atlantic the impact of such marketing practices on European economies during World War II and after and the conflicted relationship between consumer activists and the ideas of consumer engineering By connecting consumer engineering to a web of social processes in the twentieth century this volume contributes to a reassessment of consumer history more broadly

founded      **A Class Act** Susan Robertson, 2017-09-29 This book offers an original and challenging theoretical and empirical approach to mapping the changing nature of teachers work historically and in the contemporary period It is an attempt to understand how and in what ways teachers work has changed following the demise of the post war settlement and the imminent collapse of teachers project of professionalism secured through solidaristic strategies such as unionism Dr Robertson argues that in order to understand these issues a more rigorous set of conceptual tools around social class occupational power and worker control is needed The first two sections of the book set out to address that problem The final section elaborates on the changing contexts and conditions for contemporary teachers more generally and argues that structural and ideological changes within educational provision have led to differing capacities in the realization of class assets

*Academic Ableism* Jay T. Dolmage, 2017-11-22 Academic Ableism brings together disability studies and institutional critique to recognize the ways that disability is composed in and by higher education and rewrites the spaces times and economies of disability in higher education to place disability front and center For too long argues Jay Timothy Dolmage disability has been constructed as the antithesis of higher education often positioned as a distraction a drain a problem to be solved The ethic of higher education encourages students and teachers alike to accentuate ability valorize perfection and stigmatize anything that hints at intellectual mental or physical weakness even as we gesture toward the value of diversity and innovation Examining everything from campus accommodation processes to architecture to popular films about college life Dolmage argues that disability is central to higher education and that building more inclusive schools allows better education for all
