Fastforward And Out Of Control How Technology Is Changing Your Life:

Fastforward and Out of Control Heather Menzies, 1989 **Cyber-Marx** Nick Dyer-Witheford, 1999 In this highly readable and thought provoking work Nick Dyer Witheford assesses the relevance of Marxism in our time and demonstrates how the information age far from transcending the historic conflict between capital and its laboring subjects constitutes the latest battleground in their encounter Dyer Witheford maps the dynamics of modern capitalism showing how capital depends for its operations not just on exploitation in the immediate workplace but on the continuous integration of a whole series of social sites and activities from public health and maternity to natural resource allocation and the geographical reorganization of labor power He also shows how these sites and activities may become focal points of subversion and insurgency as new means of communication vital for the smooth flow of capital also permit otherwise isolated and dispersed points of resistance to connect and combine with one another Cutting through the smokescreen of high tech propaganda Dyer Witheford predicts the advent of a reinvented autonomist Marxism that will rediscover the possibility of a collective communist transformation of society Refuting the utopian promises of the information revolution he discloses the real potentialities for a new social order in the form of a twenty first century communism based on the common sharing of wealth Nature Unbound Dan Brockington, Rosaleen Duffy, Jim Igoe, 2012-07-26 Nature Unbound is an examination of the rise of protected areas and their current social and economic position in our world It examines the social impacts of protected areas the conflicts that surround them the alternatives to them and the conceptual categories they impose The Canadian experience Sarla Achuthan, 1993 **Interactive Realism** Daniel Downes, 2005-03-03 Distinguishing between the Internet a communication system and cyberspace an environment for human exchange the author provides a framework for exploring the metaphors and images used in cyberspace to represent and model social reality He clarifies how these symbolic interactions are linked to the technologies used to create store and transmit them and to their social context **Understanding Canada** Wallace Clement, 1997 As corporations are restructured governments cut back and the international economy transformed there is an increasing need to understand the economic and political forces involved evaluate their implications and develop strategies to modify them to meet society's interests In light of the current situation the study of political economy is more relevant than ever Understanding Canada examines a variety of topics from viewpoints ranging from the established to the interdisciplinary Issues such as gender Native peoples race ethnicity and migration globalization foreign policy the welfare state regulation communications popular culture and space and the environment are examined as are the more traditional subjects of economic growth resources and The new Canadian political economy has emerged from its infancy and is now regarded as a respected and innovative field of scholarship Understanding Canada furthers this tradition by focusing on current issues in an accessible and informative way Contents Introduction Whither the New Canadian Political Economy Wallace Clement Economic Growth and Economic Crisis Canadian Capitalism Through the Ages Mel Watkins Toronto

New Genetics, New Social Formations Peter Glasner, Paul Atkinson, Helen Greenslade, 2006-12-15 New genetic technologies cut across a range of public regulatory domains and private lifeworlds often appearing to generate an institutional void in response to the complex challenges they pose As a result a number of new social formations are being developed to legitimate public engagement and avoid the perceived democratic deficit that may result Papers in this volume discuss a variety of these manifestations in a global context including genetic data banks committees of inquiry non governmental organisations NGOs national research laboratories These institutions across both health and agriculture are explored in such diverse locations as Amazonia China Finland Israel the UK and the USA This volume exhibits a clear thematic coherence around the impact of the new genetics and their associated technologies on new social formations and the case studies included have a significant international focus showing a balance between theoretical and empirical approaches in this rapidly changing field This innovative new volume will be of interest to postgraduates and professionals in the fields of sociology social anthropology science and technology studies and environmental studies

God and the Chip William A. Stahl, 2009-08-03 Our ancestors saw the material world as alive and they often personified nature Today we claim to be realists But in reality we are not paying attention to the symbols and myths hidden in technology Beneath much of our talk about computers and the Internet claims William A Stahl is an unacknowledged mysticism an implicit religion By not acknowledging this mysticism we have become critically short of ethical and intellectual resources with which to understand and confront changes brought on by technology

Antimodernism and Artistic Experience Lynda Lee Jessup, 2001-12-15 Antimodernism is a term used to describe the international reaction to the onslaught of the modern world that swept across industrialized Western Europe North America and Japan in the decades around the turn of the twentieth century Scholars in art history anthropology political science history and feminist media studies explore antimodernism as an artistic response to

a perceived sense of loss in particular the loss of authentic experience Embracing the authentic as a redemptive antidote to the threat of unheralded economic and social change antimodernism sought out experience supposedly embodied in pre industrialized societies in medieval communities or oriental cultures in the Primitive the Traditional or Folk In describing the ways in which modern artists used antimodern constructs in formulating their work the contributors examine the involvement of artists and intellectuals in the reproduction and diffusion of these concepts In doing so they reveal the interrelation of fine art decorative art souvenir or tourist art and craft questioning the ways in which these categories of artistic expression reformulate and naturalise social relations in the field of cultural production North of Empire Jody Berland,2009-10-07 Theorizes the relationship between nation media and globalization by way of Canadian cultural studies
