UNISPACE '82 ,1983 The Second Substance Slobodan Andrejevic,2014-08-21 Contemporary physics is not able to determine the true content of the universe At the present time we do not have clear scientific answers to what are the universe particle mass energy gravity infinity space and many more components of the universe They are left unanswered and opened for everybody to guess We are given descriptive definitions based on study of particle motions so we have a glimpse of what the universe does but not even a rudimentary concept of what the universe is This scientific insecurity gives various ideologists open field to preach their doctrines about what is the universe and what are humans in it My background is in philosophy and physics and I spent most of my life in researching the universe content and properties I found the real logical answers which as it happened do not comply with what physics at the present time calls The Standard Model of the Universe Most of hypothetical work accomplished in this field became somehow an ideology of the modern science and a dogma of a sort Society passionately protects its dogmas as it did in Galileos time so my theory will provoke resistance among some contemporary physicists and ideologists because it is not based on quantum mechanics mathematics and principle of uncertainty Subject of quantum mechanics is universe behaviour motions quantities It only recognizes what the universe does and it cannot even express what universe is For the real answers I turned to logic and by a painstaking logical process of simplification comparison and elimination I came to conclusions which are rather surprising original and are supported by all true laws of physics and correctly interpreted experiments I replaced quantum mechanics with natural logic in the new model of the universe None of this has ever been published The Friend ,1830 **Celebrating Life Customs around the World** Victoria R. The Politics of Friendship Jacques Derrida,2020-10-13 The most influential of contemporary philosophers Jacques Derrida explores the idea of friendship and its political consequences past and future through writings by Aristotle Nietzsche Cicero and more Until relatively recently Jacques Derrida was seen by many as nothing more than the high priest of Deconstruction by turns stimulating and fascinating yet always somewhat disengaged from the central political questions of our time Or so it seemed Derrida s political turn marked especially by the appearance of *Specters of Marx* has surprised some and delighted others In *The Politics of Friendship* Derrida renews and enriches this orientation through an examination of the political history of the idea of friendship pursued down the ages Derrida s thoughts are haunted throughout the book by the strange and provocative address attributed to Aristotle my friends there is no friend and its inversions by later philosophers such as Montaigne Kant Nietzsche Schmitt and Blanchot The exploration allows Derrida to recall and restage the ways in which all the oppositional couples of Western philosophy and political thought friendship and enmity private and public life have become madly and dangerously unstable At the same time he dissects genealogy itself the familiar and male centered notion of fraternity and the virile virtue whose authority has gone unquestioned in our culture of friendship and our models of democracy The future of the political for Derrida becomes the future of friends the invention of a radically new friendship of a deeper and more inclusive democracy This remarkable book his most profoundly important for many years offers a challenging and inspiring vision of that future
