Grain Legumes and Green Manures for Soil Fertility in Southern Africa Stephen R. Waddington, 2003

Alleviating Soil Fertility Constraints to Increased Crop Production in West Africa A. Uzo Mokwunye, 2012-12-06 Tropical Africa escaped from the glaciers that covered the temperate parts of the world

during the Ice Age The legacy is that most of the parent materials of the soils of tropical Africa are old highly weathered and devoid of bases and phosphate bearing minerals Traditional farming systems which were relatively stable and sustainable relied on long fallow periods after one to two years of cropping to maintain the productive capacity of the soils In recent times and especially in densely populated areas a sizeable class of landless farmers have begun to cultivate marginal lands or to invade the forest reserves thereby exacerbating the problems of land and environmental degradation of soil fertility that will facilitate the production of adequate quantities of the principle Maintaining a level staples has become a major challenge to agricultural scientists in tropical Africa To increase the nutrient supplying power of soils requires the inputs of fertilizers These can be organic or inorganic The efficiency with which these externally supplied inputs can increase agricultural production and reduce soil and environmental deterioration is dependent on the ability of scientists to determine the right types and quantities of the products to apply to each soil crop and cropping system as well as the ability of farmers to acquire requisite farm management skills

Nitrate, Agriculture, and the Environment T. M. Addiscott, 2005 There is widespread public concern about the effects of nitrate derived from farming on water quality and public health But research on nitrate during the past decade has revealed wide discrepancies between public perceptions and reality The main problems from nitrate are ecological changes in coastal and estuarine waters and nitrous oxide in the atmosphere This gas largely derived from nitrate is a threat to the ozone layer in the stratosphere and is also a greenhouse gas This book builds on *Farming Fertilizers and the Nitrate Problem* CABI 1991 by Addiscott Whitmore and Powlson but has been restructured to take account of new developments and to bring out more clearly the role of politicians and economists in the nitrate problem
