From Cold War To Chaos Reviving Humane Development Or Remaking Market Man:

From Cold War to Chaos? James Dilloway, 1999 **From Cold War to Chaos?** James Dilloway, 1999-06-30 This challenging science based book reviews today's global situation as well as our long evolution to humanness. It uncovers a crisis in policy and behavior impending since 1990, one stemming from earlier but long outmoded assumptions that now threaten future development. In common Feasible reforms global and national are outlined. Ranging widely through time, space and subject matter and moving from earth and life history to economics and new vistas in brain science, Dilloway marshals analysis, ideas and proposals to lay bare a climactic crisis that since 1990 in particular has been systematically concealed from view by the fresh force of a current conventional wisdom. Successive chapters review our global situation in its major demographic, environmental, economic and human rights aspects. Our entire time perspective is then examined to throw new light on powerful human capacities and the way they are now being contradicted by assumptions seemingly rational two centuries ago that have become outmoded yet still decisive in the century now ending. Dilloway next looks at recent economic history to see how this now obsolete philosophy has come to prevail and how massively it opposes the cooperative social basis of our entire human potential. After reviewing a many-sided United Nations push based on environmental conservation, development and human rights, Dilloway arrives at feasible yet far-reaching proposals for stronger international government and matching basic reforms at the level of the advanced nation state. **Historical**

Dictionary of the Roosevelt-Truman Era Neil A. Wynn, 2008-07-01 The 1930s were dominated by economic collapse, stagnation and mass unemployment. This crisis enabled the Democrats to recapture the White House and embark upon a period of reform unsurpassed until the 1960s. Roosevelt's New Deal laid the foundations of a welfare system that was further consolidated during and after the Second World War. American involvement in World War II helped to secure victory in Europe and in Asia. American participation in the war led to economic recovery but also brought with it enormous demographic and social changes. Some of these changes continued after the war had ended but further political reform was to be limited due to the impact of the Cold War and the effects of America's new role as the world's leading superpower in the atomic age. The Historical Dictionary of the Roosevelt-Truman Era examines significant individuals, organizations and events in American political, economic, social and cultural history between 1933 and 1953. This was a period of enormous significance in the United States due to the impact of the Great Depression, World War II and the onset of the Cold War. The presidencies of Franklin D. Roosevelt and Harry S. Truman witnessed the origins of the modern American welfare system and the rise of the United States as a world power as well as its involvement in the confrontation with communism that dominated the latter half of the 20th century. **The A to Z of the Roosevelt-Truman Era** Neil A. Human Rights Albert A. Zinnos, 2007 Human rights refers to the concept of human beings as having universal rights or status regardless of legal jurisdiction and likewise other localising factors such as ethnicity and nationality For many the concept of human rights is based in religious principles However because a formal concept of human rights has not been universally accepted the term has some degree of variance between its use in different local jurisdictions difference in both meaningful substance as well as in protocols for and styles of application Ultimately the most general meaning of the term is one which can only apply universally and hence the term human rights is often itself an appeal to such transcended principles without basing such on existing legal concepts The term humanism refers to the developing doctrine of such universally applicable values and it is on the basic concept that human beings have innate rights that more specific local legal concepts are often based Within particular societies human rights refers to standards of behaviour as accepted within their respective legal systems regarding 1 the well being of individuals 2 the freedom and autonomy of individuals and 3 the representation of the human interest in government These rights commonly include the right to life the right to an adequate standard of living the prohibition of genocide freedom from torture and other mistreatment freedom of expression freedom of movement the right to self determination the right to education and the right to participation in cultural and political life These norms are based on the legal and political traditions of United Nations member states and are incorporated into international human rights instruments This new book brings together the latest book literature centred on this crucial topic
