closure of Ontario s government run institutions for people with intellectual disabilities has allowed accounts of those affected to emerge Madeline Burghardt draws from narratives of institutional survivors their siblings and their parents to examine the far reaching consequences of institutionalization due to intellectual difference Beginning with a thorough history of the rise of institutions as a system to manage difference Broken provides an overview of the development of institutions in Ontario and examines the socio political conditions leading to families decisions to institutionalize their children Through this exploration other themes emerge including the historical and arbitrary construction of intellectual disability and the resulting segregation of those considered a threat to the well being of the family and society the overlap between institutionalization and the workings of capitalism and contemporaneous practices of segregation in Canadian history such as Indian residential schools Drawing from people s direct lived experiences the second half of the book gathers poignant accounts of institutionalization s cascading effects on family relationships and understandings of disability ranging from stories of personal loss and confusion to family breakage Adding to a growing body of work addressing Canada s treatment of historically marginalized peoples Broken exposes the consequences of policy based on socio political constructions of disability and difference and of the fundamentally unjust premise of institutionalization *The Future of Reason, Science and Faith* J. Andrew Kirk,2016-12-05 Focusing on the history of ideas this book explores important questions concerning

knowledge in relation to philosophy science ethics and Christian faith Kirk contributes to the current debate about the intellectual basis and integrity of Western culture exploring controversial issues concerning the notions of modernity and post modernity Repositioning the Christian faith as a valid dialogue partner with contemporary secular movements in philosophy and ethics Kirk seeks to show that in post Christian Europe the Christian faith still possesses intellectual resources worthy to be reckoned with This book s principal argument is that contemporary Western society faces a cultural crisis It explores what appears to be an historical enigma namely the question of why Western intellectual endeavours in philosophy and science seem to have abandoned the search for a source of knowledge able to draw together disparate pieces of information provided by different disciplines Kirk draws conclusions particularly in the area of ethical decision making from this apparent failure and invites readers to consider Christian theism afresh as a means for the renewal of culture and society
