Who Rules the Net? Adam D. Thierer, Clyde Wayne Crews, 2003-10-25 The rise of the Internet has challenged traditional concepts of jurisdiction governance and sovereignty Many observers have praised the Internet for its ubiquitous and borderless nature and argued that this global medium is revolutionizing the nature

of modern communications Indeed in the universe of cyberspace there are no passports and geography is often treated as a meaningless concept But does that mean traditional concepts of jurisdiction and governance are obsolete When legal disputes arise in cyberspace or when governments attempt to apply their legal standards or cultural norms to the Internet how are such matters to be adjudicated Cultural norms and regulatory approaches vary from country to country as reflected in such policies as free speech and libel standards privacy policies intellectual property antitrust law domain name dispute resolution and tax policy In each of those areas policymakers have for years enacted myriad laws and regulations for realspace that are now being directly challenged by the rise of the parallel electronic universe known as cyberspace Who is responsible for setting the standards in cyberspace Is a U N for the Internetor a multinational treaty appropriate If not who s standards should govern cross border cyber disputes Are different standards appropriate for cyberspace and real space Those questions are being posed with increasing frequency in the emerging field of cyberspace law and constitute the guiding theme this book s collection of essays

Lingua Franca ,1995 *Closing an Era* Richard J. Cox,2000-09-30 The importance of records in modern society is explored by re examining some of the historical antecedents for critical functions in the modern records professions The motivation for writing this book comes from a conviction of the importance of records and records professionals in organizations and society as well as the need to possess a stronger sense of the events trends people debates and controversies producing the modern records professions Archivists and records managers have tended to discount the importance of their historical antecedents ignoring the fact that many of the current debates and issues before the profession are not new but embedded in the historical evolution of the records professions Re examining some of the historical origins helps records professionals to re examine their mission to manage records for the benefit of organizations and of all of society Such re evaluation also helps to remind records professionals and others that the concerns generated by new electronic recordkeeping technologies are not new at all but built deep within the fabric of traditional records creation and administration
