Balk, 2014-02-18 For some life's introduction to death and grief comes early and when it does it can take many forms Not

only does *Dealing with Dying Death and Grief during Adolescence* tackle them all it does so with David Balk's remarkable sensitivity to and deep knowledge of the pressures and opportunities adolescents face in their transition from childhood to adulthood. In seamless jargon-free language, Balk brings readers up to date with what we know about adolescent development because over time such changes form the backstory we need to comprehend the impact of death and bereavement in an adolescent's life. The book's later chapters break down the recent findings in the study of life-threatening illness and bereavement during adolescence. And crucially, these chapters also examine interventions that assist adolescents coping with these difficulties. Clinicians will come away from this book with both a grounded understanding of adolescent development and the adolescent experience of death, and they'll also gain specific tools for helping adolescents cope with death and grief on their own terms. For any clinician committed to supporting adolescents facing some of life's most difficult experiences, this integrated, up-to-date, and deeply insightful text is simply the book to have. David E. Balk is professor in the department of health and nutrition sciences at Brooklyn College CUNY where he directs the graduate program in thanatology. He is the author of *Adolescent Development: Early Through Late Adolescence*, *Helping the Bereaved College Student*, and several other books on death and bereavement. He is also co-editor of the 2nd edition of the *Handbook of Thanatology* (Routledge, 2013).

The Psychology of Grief (Richard Gross, 2018-03-15) What is happening emotionally when we grieve for a loved one? Is there a right way to grieve? What effect does grief have on how we see ourselves? *The Psychology of Grief* is a humane and intelligent account that highlights the wide range of responses we have to losing a loved one and explores how psychologists have sought to explain this experience. From Freud's pioneering psychoanalysis to discredited ideas that we must pass through stages of grief, the book examines the social and cultural norms that frame or limit our understanding of the grieving process, as well as looking at the language we use to describe it. Everyone at some point in their lives experiences bereavement, and *The Psychology of Grief* will help readers understand both their own and others' feelings of grief that accompany it. *Evidence-Based Practice with Emotionally Troubled Children and Adolescents* (Morley D.
